KVM Switch Accessories - SUN Server Interface Module for NetDirector Matrix KVM Switches

Highlights

- Needed to connect a SUN computer/server to a B060-032 or B060-016-2 NetDirector Matrix KVM switch via Cat5e cable
- Easy to install; no software needed
- Allows a maximum distance of 500ft from KVM to Server via Cat5e cable
- Compact and lightweight design

Description

Tripp Lite's SUN Server Interface Module connects to the USB and HD15 ports on a SUN Server, and converts them to a single RJ45 connector. Unit is specifically designed for SUN Keyboard signals. Ordinary Cat5e patch cables can then be used to connect the server to the switch ports on a Tripp Lite B060-032 or B060-016-2 NetDirector Matrix KVM switch. Use of Cat5e cables frees up space in the server cabinet that would be filled by traditional, thicker KVM cables.

System Requirements

- SUN Server or CPU with a HD15 connector and USB connector
- A B060-032 or B060-016-2 NetDirector Matrix KVM Switch
