

Serial to USB Cable

USB to Serial Converter

This USB to Serial adapter is ideal for connecting to Roving Networks Bluetooth and WiFi development kits to your computer. Additionally this product is useful for connecting modems, GPS units, industrial controllers or any other device with a RS232 port. The RN-USB-SERIAL provides connections up to 1Mbit data transfer rate. Since USB does not require any IRQ resources more devices can be attached to your computer without resource conflicts. The RN-USB-SERIAL product allows you to connect serial devices to newer computers that don't have serial ports. For a wireless connection check out our Bluetooth Serial Adapters.

The RN-USB-SERIAL cable is USB 1.1 compliant converter that supports advanced power management and remote wake-up. The USB cable adapter is designed to work on all Windows operating systems.

Features

- Support RS232 interface
