<b>Type of Change:</b>	Product Design Change			
<b>Change Description:</b>	<p>Receptacle terminal refinements and enhancements:  Housing and terminal geometry optimized relative to each other and relative to plug assembly.  All changes are backward compatible with FCI and competitive products. Part numbers remain the same.</p>			
<b>Reason for Change:</b>	<p>Refinements satisfy stringent requirements of new market applications and provide improved long term product performance.  Performance benefits include:</p> <ol style="list-style-type: none"> <li>1. Early contact point with increased wipe, expands practical system tolerances and improves system reliability</li> <li>2. Stress relaxation is minimized to sustain more constant normal force and maintain low mating force.</li> <li>3. Reduced slot width restricts lateral contact movement and provides more precise alignment to the center of the mating plug terminal.</li> <li>4. Re-inforced housing makes connector interface more rugged by restricting rocking action.</li> <li>5. Tapered PCB locator makes hand assembly easier</li> <li>6. FCI logo helps customers identify connector supplier.</li> </ol>			
<b>Affected Parts:</b>	61082 and 10069524 series; All PNs
