The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. All non-RoHS products have been discontinued, or will be discontinued soon. Please check the products status on the Hirose website RoHS search at www.hirose-connectors.com, or contact your Hirose sales representative.

1mm Pitch Connector for Vertical Connection

FX5 Series

Features

1. Header Side : 2 Types Available

Two header types, low profile and high profile, are prepared according to the contact number variation and the connecting height variation, considering unit connections of HDD, FDD, CD-ROM and so on.

2. Two-stages Sequential Structure

The connecting sequence is designed with 2 stages so that the end user side can maintain.

3. Mating Guide

In the connecting process, the self-alignment is ± 1 mm high sufficient to the guide level, and the guide rib is provided to achieve easy mating.

4. SMT Coplanarity

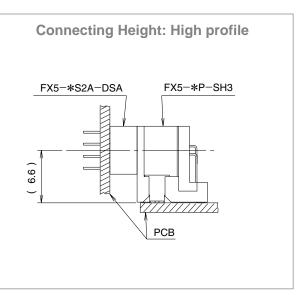

The coplanarity of SMT soldered area secures the high accuracy of 0.1mm.

5. Miniaturization

The connector is miniaturized about 30% in the mounting area, compared with the conventional half pitch connector (1.27mm).

Applications

Note PC , other business equipments

■Product Specifications

Rating	Current rating	0.5A	Operating Temperature Range	-55℃ to +85℃ (Note 1)	Storage Temperature Range	-10°C to +60°C (Note 2)
Rauny	Voltage rating	100V AC	Operating Humidity Range	40% to 80%	Storage Humidity Range	40% to 70%

Item	Specifications	Condition			
1. Insulation Resistance	100M ohms min.	250V DC	2		
2. Withstanding voltage	No flashover or insulation breakdown.	300V AC	C/1 minute		
3. Contact Resistance	50m ohms max.	100mA			
4. Vibration	4. Vibration No electrical discontinuity of 1μ s or more		0 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 directions.		
5. Moisture Resistance	5. Moisture Resistance Contact resistance: 60m ohms max. Insulation resistance: 100M ohms min.		96 hours at temperature of 40℃ and humidity of 90% to 95%		
6. Temperature Cycle	Contact resistance: 60m ohms max. Insulation resistance: 100M ohms min.		(-55℃: 30 minutes, 15 to 35℃: 2 to 3 minutes 85℃: 30 minutes, 15 to 35℃: 2 to 3minutes) 5 cycles		
7. Durability (Mating/un-mating)	Contact resistance: 60m ohms max.		500 cycles		
		ONAT	Reflow: At the recommended temperature profile		
8. Resistance to Soldering heat	No deformation of components affecting performance.	SMT	Manual soldering: 360°C for 5 seconds		
	no deformation of components affecting performance.	DIP	Solder Bath: 260℃ for 10 seconds		
			Manual soldering: 360° for 5 seconds		

Note 1: Includes temperature rise caused by current flow.

Note 2: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non conducting condition of installed connectors in storage, shipment or during transportation.

Note 3: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

Material

Part	Part Material		Remarks
Insulator	Polyamide	Beige	UL94V-0
Header Contact	Brass	Contact area : Gold plated	
Receptacle Contact	Phosphor bronze	Lead area : Tin plated	

Note : The black dots on the insulater will not affect performance.

Recommended Temperature Profile

HRS test conditions

Test boardGlass epoxy 110mm×40mm×1.6mm thick						
Solder method	:Reflow					
Solder composition	:Paste,					
	96.5%Sn/3%Ag/0.5%Cu					
Metal mask	: 0.15mm thick					
Reflow cycles	: 1 cycles					

The temperature profile is based on the above conditions.

In individual applications the actual temperature may vary, depending on solder paste type,

volume/thickness and board size/thickness. Consult your solder paste and equipment manufacturer for specific recommendations.

Cleaning Conditions

1. Organic Solvent Cleaning

Solvent	Cold Cleaning	Heat Cleaning	
IPA (Isopropyl alcohol)	\bigcirc	\bigcirc	
HCFC (Hydrochlorophloro carbon)	\bigcirc	\bigcirc	

*Methylene chroride isn't suitable for this product solvent.

2. Liquid Cleaning

When liquid detergents (such as terpene, alkali saponifier) are used, please select the cleaning detergent according to the influence table on metal or resin which is issued from each detergent manufacturer. In addition, please do not leave the connector outdoor, in which moisture remains.

3. Cautions for Cleaning

As for organic solvent or liquid cleaning, if flux or detergent remains on the connector, it can cause electrical performance degradation. Therefore, please make sure that the connector is thoroughly cleaned so that neither flux nor detergent is found on the connector.

Connector Precautions

1. Tolerance Clearance on Mating Side

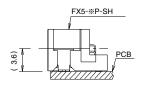

The effective connection clearance of the product is 1.6mm. Please use the product so as to specify within 1mm the clearance between the header and the receptacle in the connection process.

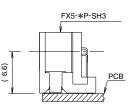

2. Header Connector Height

The SMT connector height doesn't include the solder paste thickness. Thus, please consider that the stacking height will slightly increase after the mounting process.

Mating Height: Low profile

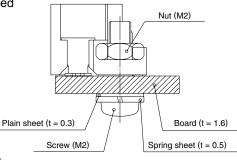

Mating Height: High profile

3. Screw Fastening Torque (SMT Type)

When the screw is fastened, please use the M2 screw. The recommended fastening torque is 0.15(N.m) max.

4. Prefixed Process to Board (Through hole Type) If the prefixed process is required for board mounting, please use the

prefixed pin type. (Applicable Thickness t = 1.6 ± 0.1) **Note:**

When the connector is mounted on the board, the dip post is guided into the board through-hole in order to prevent the dip post damage, and then insert the board in parallel to the connector so as to push in the prefixed pin.

5. Plug and Play

When the connector is inserted or extracted in the active line state, please contact HRS company.

6. Others

- It is noted that the forced excessive insertion/extraction will result in damage.
- Avoid holding the board with the connector only, and fix the board by any other means except for the connector.
- The color phase of this product may be slightly different from that of the forming product according to the manufacturing lot, but the difference doesn't affect the performance.
