# **Push-on Bayonet Lock Miniature Waterproof Connector**

#### HR34B Series

#### **■**Features

#### 1. Water and dust protection

- · IP67 water and dust protection rating when fully mated.
- · Resistant to industrial grade oils.
- 4-position receptacles are sealed against water penetration when mounted on the panel no protective cap is required.

#### 2. Easy and precise mating

- Mating: Just inserting plug unit completes mating Unmating: Rotating sleeve counterclockwise unlocks connectors (fig.1)
- · Marking helps align plug with receptacle when mating.
- 3 guide keys make blind mating possible.
   (Receptacle structure prevents plug from damaging receptacle terminals)

#### 3. Multi-directional cable exit

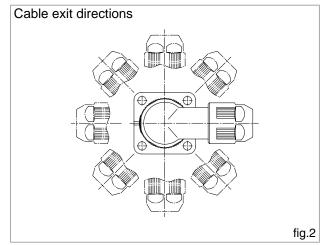

Right angle plugs allow the cable to exit in 8 directions, in  $45^{\circ}$  increments.(fig.2)

#### 4. Safty standards

The 4-position connectors meet requirements of TÜV standard.

#### 5. Wide variation

#### **■**Handling

#### **■**Precautions

When completely mated and locked the alignment arrow on the plug must line-up with the center line of the connector (alignment mark on the receptacle).

If the alignment arrow and the center line of the connectors are not aligned (1 mm max.) re-insert the plug until they are aligned.

- 1. When disconnecting or inserting the connector, be sure to do so after turning off the power.
- 2. To insert the connector, push it in until the arrow tip of the plug mating mark indicates the specified position of the diagram below (i.e., the mating mark of the receptacle).
- 3. Note that the display method of the mating mark will differ depending on the receptacle.
- 4. To maintain the waterproof quality and cable clamp force, use a cable that is within the range of the applicable cable diameter.
- 5. Please consult Hirose Electric Sales for harness assembly procedure.
