Low protrusion of only 6mm above the mounting surface (receptacle).

3. Light weight

Weight is only 0.18g.

4. Durability

High durability(mating/unmating) of 10 000 cycles.

5. Automatic mounting

Receptacle designed for placement on board with automated equipment.

6. Frequency range

Can be used from DC to 2.5 GHz and with GSM, PCS, cdma-One,W-CDMA, etc.

7. Plugs

Wide variety of mating heights are available.

8. Solder wicking

Receptacle terminations are designed to prevent solder wicking into the critical contact areas.

9. Self alignment of mating parts

Inducement to floating is ± 0.5 mm.

■ Applications

Mobile Phone antenna switching
Checks of microwave boards, etc.

■ Materials

Part	Material	Finish	Remarks
Outer shell	Phosphor bronze	Gold plating	-----
Insulator	Polyamide	-----	UL94HB
Common contact	Beryllium copper	Mounting area : Solder plating	-----
		Contact area : Gold plating	-----
Board circuit side (N.C.) contact	Beryllium copper	Mounting area : Solder plating	-----
		Contact area : Gold plating	-----

■ Overview and applications

Designed primarily as interface coaxial switch for mobile phones, they are also used in variety of other applications requiring redirecting of signals when mating with corresponding plug.

The mating action redirects the signals from the receptacle side to the plug side.
