## FPF1003A

IntelliMAX ${ }^{\text {TM }}$ Advanced Load Management Products

## Features

－ 1.2 to 5.5 V Input Voltage Range
－$R_{\mathrm{DS}(\mathrm{ON})}=30 \mathrm{~m} \Omega @ \mathrm{~V}_{\mathrm{IN}}=5.5 \mathrm{~V}$
－$R_{\mathrm{DS}(\mathrm{ON})}=35 \mathrm{~m} \Omega @ \mathrm{~V}_{\mathrm{IN}}=3.3 \mathrm{~V}$
■ ESD Protected，above 5500V HBM
－RoHS Compliant

## Applications

－PDAs
－Cell Phones
－GPS Devices
－MP3 Players
－Digital Cameras
■ Peripheral Ports
■ Hot Swap Supplies

## General Description

The FPF1003A is low RDS P－Channel MOSFET load switches with controlled turn－on．The input voltage range operates from 1.2 V to 5.5 V to fulfill today＇s Ultra Portable Device＇s supply requirement．Switch control is by a logic input（ON）capable of interfacing directly with low voltage control signal．
FPF1003A is available in a space－saving $1.0 \times 1.5 \mathrm{~mm}^{2}$ chip scale package，1．0X1．5CSP－6．

Ordering Information

| Part | Switch | Input buffer | Output Discharge | ON Pin Activity |
| :---: | :---: | :---: | :---: | :---: |
| FPF1003A | $30 \mathrm{~m} \Omega$, PMOS | Schmitt | NA | Active HI |

## Functional Block Diagram

## Pin Configuration

## Pin Description

| Pin | Name | Function |
| :---: | :---: | :--- |
| A2, B2 | $\mathrm{V}_{\text {IN }}$ | Supply Input: Input to the power switch and the supply voltage for the IC |
| C2 | ON | ON Control Input |
| A1, B1 | V OUT | Switch Output: Output of the power switch |
| C1 | GND | Ground |

Absolute Maximum Ratings

| Parameter |  | Min | Max | Unit |
| :---: | :---: | :---: | :---: | :---: |
| $\mathrm{V}_{\text {IN }}, \mathrm{V}_{\text {OUT }}$, ON to GND |  | -0.3 | 6 | V |
| Power Dissipation @ $\mathrm{T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$ (Note 1) |  |  | 1.2 | W |
| Maximum Continuous Switch Current |  |  | 2.0 | A |
| Operating Temperature Range |  | -40 | 125 | ${ }^{\circ} \mathrm{C}$ |
| Storage Temperature |  | -65 | 150 | ${ }^{\circ} \mathrm{C}$ |
| Thermal Resistance, Junction to Ambient |  |  | 85 | ${ }^{\circ} \mathrm{C} / \mathrm{W}$ |
| Electrostatic Discharge Protection | HBM | 5500 |  | V |
|  | CDM | 1500 |  | V |

## Recommended Operating Range

| Parameter | Min | Max | Unit |
| :--- | :---: | :---: | :---: |
| $\mathrm{V}_{\mathbb{I N}}$ | 1.2 | 5.5 | V |
| Ambient Operating Temperature, $\mathrm{T}_{\mathrm{A}}$ | -40 | 85 | ${ }^{\circ} \mathrm{C}$ |

Electrical Characteristics
$\mathrm{V}_{\text {IN }}=1.2$ to $5.5 \mathrm{~V}, \mathrm{~T}_{\mathrm{A}}=-40$ to $+85^{\circ} \mathrm{C}$ unless otherwise noted. Typical values are at $\mathrm{V}_{I N}=3.3 \mathrm{~V}$ and $\mathrm{T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$.

| Parameter | Symbol | Conditions | Min | Typ | Max | Units |

## Description of Operation

The FPF1003A is low $R_{D S(O N)}$ P-Channel load switches with controlled turn-on. The core of each device is a $30 \mathrm{~m} \Omega \mathrm{P}$-Channel MOSFET and a controller capable of functioning over a wide input operating range of $1.2-5.5 \mathrm{~V}$. Switch control is by a logic input (ON) capable of interfacing directly with low voltage control signal

## Application Information

## Typical Application

## Input Capacitor

To limit the voltage drop on the input supply caused by transient in-rush currents when the switch turns-on into a discharged load capacitor or short-circuit, a capacitor needs to be placed between $\mathrm{V}_{\mathrm{IN}}$ and GND. A $0.1 \mu \mathrm{~F}$ ceramic capacitor, $\mathrm{C}_{\mathrm{IN}}$, must be placed close to the $\mathrm{V}_{\mathrm{IN}}$ pin. A higher value of $\mathrm{C}_{\mathrm{IN}}$ can be used to further reduce the voltage drop experienced as the switch is turned on into a large capacitive load.

## Output Capacitor

A $0.1 \mu \mathrm{~F}$ capacitor, $\mathrm{C}_{\text {OUT }}$, should be placed between $\mathrm{V}_{\text {OUT }}$ and GND. This capacitor will prevent parasitic board inductance from forcing $\mathrm{V}_{\text {OUT }}$ below GND when the switch turns-off. Due to the integral body diode in the PMOS switch, a $\mathrm{C}_{\mathrm{IN}}$ greater than $\mathrm{C}_{\text {OUT }}$ is highly recommended. A $\mathrm{C}_{\text {OUT }}$ greater than $\mathrm{C}_{\text {IN }}$ can cause $\mathrm{V}_{\text {OUT }}$ to exceed $\mathrm{V}_{\text {IN }}$ when the system supply is removed. This could result in current flow through the body diode from $\mathrm{V}_{\text {OUT }}$ to $\mathrm{V}_{\text {IN }}$.

## Board Layout

For best performance, all traces should be as short as possible. To be most effective, the input and output capacitors should be placed close to the device to minimize the effects that parasitic trace inductances may have on normal and short-circuit operation. Using wide traces for $\mathrm{V}_{\mathrm{IN}}, \mathrm{V}_{\mathrm{OUT}}$ and GND will help minimize the parasitic electrical effects along with minimizing the case to ambient thermal impedance

## DISCLAIMER

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY, FUNCTION, OR DESIGN. FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS, NOR THE RIGHTS OF OTHERS THESE SPECIFICATIONS DO NOT EXPAND THE TERMS OF FAIRCHILD'S WORLDWIDE TERMS AND CONDITIONS, SPECIFICALLY THE WARRANTY THEREIN, WHICH COVERS THESE PRODUCTS.

## LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION.

As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
2. A critical component in any component of a life support, device, or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

## ANTI-COUNTERFEITING POLICY

Fairchild Semiconductor Corporation's Anti-Counterfeiting Policy. Farichild's Anti-Counterfeiting Policy is also stated on our external website, www.fairchildsemi.com, under Sales Support.

Counterfeiting of semiconductor parts is a growing problem in the industry. All manufactures of semiconductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed application, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Farichild strongly encourages customers to purchase Farichild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above. Products customers buy either from fairchild directly or from Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handing and storage and provide access to Farichild's full range of up-to-date technical and product information. Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address and warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Farichild is committed to committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors.

## PRODUCT STATUS DEFINITIONS

Definition of Terms

| Datasheet Identification | Product Status | Definition |
| :--- | :--- | :--- |
| Advance Information | Formative / In Design | Datasheet contains the design specifications for product development. Specifications <br> may change in any manner without notice. |
| Preliminary | First Production | Datasheet contains preliminary data; supplementary data will be published at a later <br> date. Fairchild Semiconductor reserves the right to make changes at any time without <br> notice to improve design. |
| No Identification Needed | Full Production | Datasheet contains final specifications. Fairchild Semiconductor reserves the right to <br> make changes at any time without notice to improve the design. |
| Obsolete | Not In Production | Datasheet contains specifications on a product that is discontinued by Fairchild <br> Semiconductor. The datasheet is for reference information only. |
