

Programmable negative supply IC **BD6112FVM**

● Description

BD6112FVM is a charge-pump negative supply IC with a built-in regulator. The charge-pump block inverts the positive supply voltage in the VBAT pin into a negative voltage, which generates from the NEGOUT pin. The regulator block stabilizes this negative voltage with low-noise that produces from the OUT pin. Output voltage values of this regulator can be controlled by voltage value inputted to the VIN pin and determined by $OUT = -1.6 \times VIN$.

● Dimension (Units : mm)

MSOP8

● Features

- 1) Built-in high efficiency, inverting charge-pump
- 2) Built-in negative voltage regulator
(low noise, output voltage variable)
- 3) Built-in standby SW (pull down resistance 1MΩ)
- 4) Ultra small MSOP8 package

● Applications

Small terminal devices such as cellular phones, PHS, and PDA etc.
Other equipments driven by battery required for negative voltage.

● Absolute Maximum Ratings (Ta=25°C)

Parameter	Symbol	Limits	Unit
Maximum applied supply voltage	VBAT	-0.3 ~ +6.0	V
Maximum applied input voltage	VIN	-0.3 ~ +6.0	V
Power dissipation	Pd	350 *	mW
Operating temperature range	Topr	-30 ~ +85	°C
Storage temperature range	Tstg	-55 ~ +125	°C

* Derating : 3.5mW/°C for operation above Ta=25°C

● Recommended Operating Conditions (Ta=25°C)

Parameter	Symbol	Min.	Typ.	Max.	Unit
Power supply voltage	VBAT	2.5	3.6	5.5	V

● Electrical characteristics (Unless otherwise noted; Ta=25°C, VBAT=3.6V, STBY=3.6V)

Parameter	Symbol	Min.	Typ.	Max.	Unit	Conditions
Circuit current	IQ1	–	0.5	3	mA	No load, VIN=1.25V
Stand-by current	IQ2	–	–	5	μA	No load, VIN=0V, STBY=0V
<Regulator block>						
Output voltage 1	Vo	-2.1	-2.0	-1.9	V	VIN=1.25V, IOUT=5mA
Output voltage 2	Vo2	Vo x 0.95	Vo	Vo x 1.05	V	VIN=0.5~1.8V, Vo=-1.6 x VIN, IOUT=5mA
Output ripple voltage	VRR	–	-70	-60	dBV	VIN=1.25V, IOUT=5mA
Maximum output current	IOMAX	10	–	–	mA	VIN=1.25V, VOUT≤Vo+0.1V
Load regulation	ΔVOL	–	2	40	mV	VIN=1.25V, Io=0~5mA
Line regulation	ΔVOI	–	10	40	mV	VBAT=3.0~6.0V, Io=5mA
VIN pin inflow current	IIN	–	0	2	μA	VIN=1.25V
<Charge-pump block>						
Oscillation frequency	fosc	–	120	–	kHz	
Voltage conversion efficiency	VCE	–	97	–	%	No load, NEGOUT monitor
Stand-by pin pull down resistance	RSTBY	0.6	1.0	1.6	MΩ	
Stand-by pin control voltage	Operating	VIH	2.0	–	–	V
	Non-operating	VIL	-0.3	–	0.3	V

● Application Circuit

Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the product described in this document are for reference only. Upon actual use, therefore, please request that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard use and operation. Please pay careful attention to the peripheral conditions when designing circuits and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or otherwise dispose of the same, no express or implied right or license to practice or commercially exploit any intellectual property rights or other proprietary rights owned or controlled by ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document use silicon as a basic material.
Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

About Export Control Order in Japan

Products described herein are the objects of controlled goods in Annex 1 (Item 16) of Export Trade Control Order in Japan.

In case of export from Japan, please confirm if it applies to "objective" criteria or an "informed" (by MITI clause) on the basis of "catch all controls for Non-Proliferation of Weapons of Mass Destruction.
