1. General Specifications

Operating Temp.	: min. 0°C \sim max. 50°C
Storage Temp.	: min20°C \sim max. 70°C
Display Format	: 16 characters \times 2 lines
Display Fonts	: 5 \times 8 dots (1 character)
Viewing Area	: 61.0 (W) \times 16.0 (H) mm
Outline Dimensions	: 84.0 (W) \times 44.0 (H) \times 11.0 max. (D) mm
Waisht	50
Weight	: 50g max.
LCD Type	: 50g max. : NSD-7047
C	
C	: NSD-7047
LCD Type	: NSD-7047 (STN / Neutral-mode / Transflective)
LCD Type Viewing Angle	 NSD-7047 (STN / Neutral-mode / Transflective) 6:00

2.4.Lighting Specifications

2.4.1.Absolute Maximum Rating

Ta=25°C

					-
Parameter	Conditions	Min.	Тур.	Max.	Units
Input Voltage	_	—	_	150	Vrms
Input Frequency	AC100Vrms	—	—	800	Hz

2.4.2.Operating Characteristics

Ta=25℃

					-
Parameter	Conditions	Min.	Тур.	Max.	Units
Input Voltage	—	—	100	-	Vrms
Input Frequency	—	_	400	_	Hz
Current	AC100Vrms, 400Hz	—	1.8	2.4	mA
Luminance of	AC100Vrms, 400Hz	40	50	-	cd/m ²
Backlight Surface					
Life	AC100Vrms, 400Hz	2000	_	_	hrs
	Ta=20°C, 60%RH				

Recommended Inverter : TH-201 (DC 5.0V \pm 10%, Produced by NEC)

DMC16207N-EB* (0	CW) No.2000-0202	OPTREX CORPORATION	Page 5/16

3. Optical Specifications

3.1.LCD Driving Voltage

Parameter	Symbol	Conditions	Min.	Тур.	Max.	Units
Recommended		Ta= 0°C			5.3	V
LCD Driving Voltage	V _{CC} -V _{EE}	Ta=25°C	4.4	4.7	5.0	v
Note 1		Ta=50°C	4.1		_	V

Note 1 : Voltage (Applied actual waveform to LCD Module) for the best contrast. The range of minimum and maximum shows tolerance of the operating voltage. The specified contrast ratio and response time are not guaranteed over the entire range.

3.2.Optical Characteristics

Ta=25°C, 1/16 Duty, 1/5 Bias, V_D=4.7V (Note 4), $\theta = 0^{\circ}$, $\phi = -^{\circ}$

Pa	rameter	Symbol	Conditions	Min.	Тур.	Max.	Units
Contrast Rat	tio Note 1	CR	$\theta = 0^{\circ}, \phi = -^{\circ}$	_	5	_	
Viewing An	gle			Shown is	n 3.3		
Response	Rise Note 2	Ton	—	_	140	210	ms
Time	Decay Note 3	Toff	—		180	270	ms

Note 1 : Contrast ratio is definded as follows.

 $CR = L_{OFF} / L_{ON}$

LON : Luminance of the ON segments

LOFF : Luminance of the OFF segments

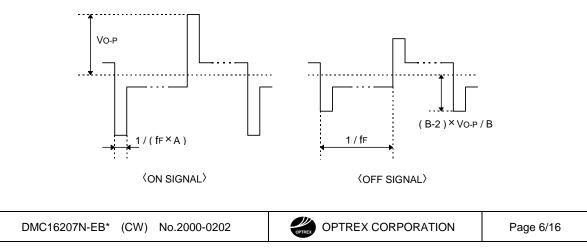

- Note 2 : The time that the luminance level reaches 90% of the saturation level from 0% when ON signal is applied.
- Note 3 : The time that the luminance level reaches 10% of the saturation level from 100% when OFF signal is applied.

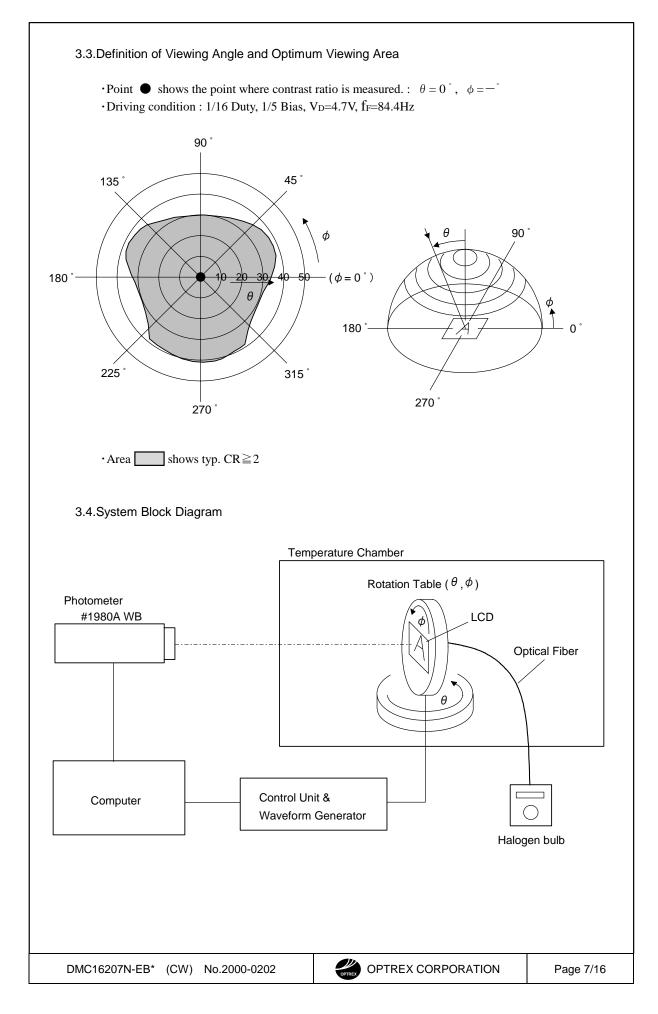

Note 4 : Definition of Driving Voltage V_D

Assuming that the typical driving waveforms shown below are applied to the LCD Panel at 1/A Duty - 1/B Bias (A : Duty Number, B : Bias Number). Driving voltage V_D is definded as follows.

 $V_D = (Vth1+Vth2) / 2$

- $\label{eq:Vth1} Vth1: The \ voltage \ V_{O-P} \ that \ should \ provide \ 50\% \ of \ the \ saturation \ level \ in \ the \ luminance \ at \ the \ segment \ which \ the \ ON \ signal \ is \ applied \ to.$
- $\label{eq:Vth2} Vth2: The voltage V_{O-P} \mbox{ that should provide 50\% of the saturation level in the luminance at the segment which the OFF signal is applied to.$

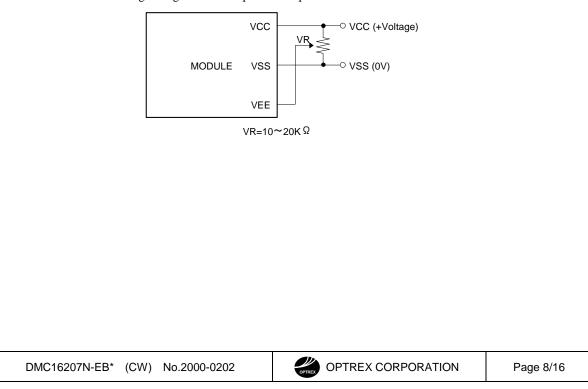

4.<u>I/O Terminal</u>

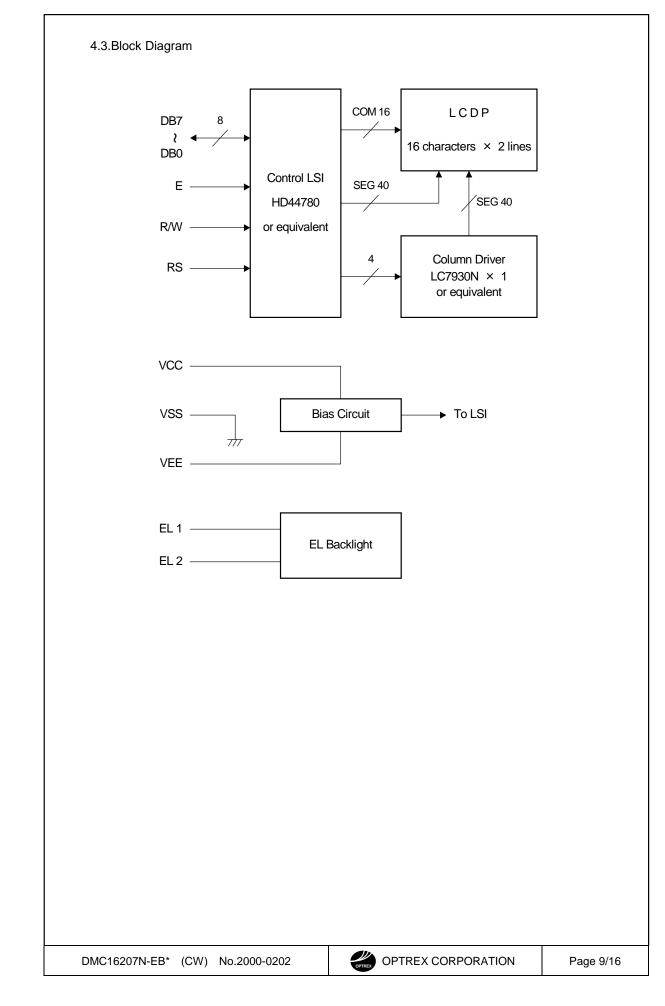

4.1.Pin Assignment

No.	Symbol	Level	Function
1	Vss	_	Power Supply (0V, GND)
2	Vcc	_	Power Supply for Logic
3	V _{EE}	_	Power Supply for LCD Drive
4	RS	H / L	Register Select Signal
5	R/W	H/L	Read/Write Select Signal H: Read L: Write
6	Е	H/L	Enable Signal (No pull-up Resister)
7	DB0	H/L	Data Bus Line / Non-connection at 4-bit operation
8	DB1	H/L	Data Bus Line / Non-connection at 4-bit operation
9	DB2	H/L	Data Bus Line / Non-connection at 4-bit operation
10	DB3	H/L	Data Bus Line / Non-connection at 4-bit operation
11	DB4	H/L	Data Bus Line
12	DB5	H / L	Data Bus Line
13	DB6	H / L	Data Bus Line
14	DB7	H / L	Data Bus Line
15	EL 1	—	Power Supply for EL
16	EL 2	_	Power Supply for EL

4.2.Example of Power Supply

It is recommended to apply a potentiometer for the contrast adjust due to the tolerance of the driving voltage and its temperature dependence.

5.<u>Test</u>

No change on display and in operation under the following test condition.

1High Temperature2Low Temperature3High Temperature4Low Temperature5Damp Proof Test	<u> </u>			Notes
 3 High Temperature 4 Low Temperature 5 Damp Proof Test 	Operating 0°C	$C \pm 2^{\circ}C$, 96hrs (operat	ion state)	
4 Low Temperature 5 Damp Proof Test		$\pm 2^{\circ}$ C, 96hrs (operatio	on state)	3
5 Damp Proof Test	Storage 70°C	$C \pm 2^{\circ}C$, 96hrs		4
	Storage -20°	$C \pm 2^{\circ}C$, 96hrs		3, 4
	40°0	$C\pm 2^{\circ}C, 90\sim 95\%$ RH	, 96hrs	3, 4
6 Vibration Test	Tota	al fixed amplitude : 1.5	5mm	5
	Vib	ration Frequency : 10-	~55Hz	
	One	cycle 60 seconds to 3	directions of X, Y, Z	for
	each	n 15 minutes		
7 Shock Test	To t	be measured after drop	ping from 60cm high	on
	the	concrete surface in pa	cking state.	
	F	G D C B A 60cm Concrete Surface	Dropping method corner dro A corner : once Edge dropping B,C,D edge : once Face dropping E,F,G face : once	pping
Humidity : 6 Note 2 : Unless otherwise sp Note 3 : No dew condensation Note 4 : The function test sha after removed from	on to be observed. all be conducted after		-	nd humidity
Note 5 : Vibration test will b		oduct itself without pu	tting it in a container.	

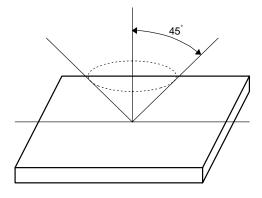

6. Appearance Standards

6.1.Inspection conditions

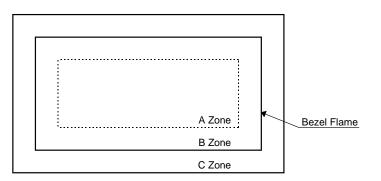

The LCD shall be inspected under 40W white fluorescent light.

The distance between the eyes and the sample shall be more than 30cm.

All directions for inspecting the sample should be within 45 $^{\circ}\,$ against perpendicular line.

6.2. Definition of applicable Zones

A Zone : Active display area

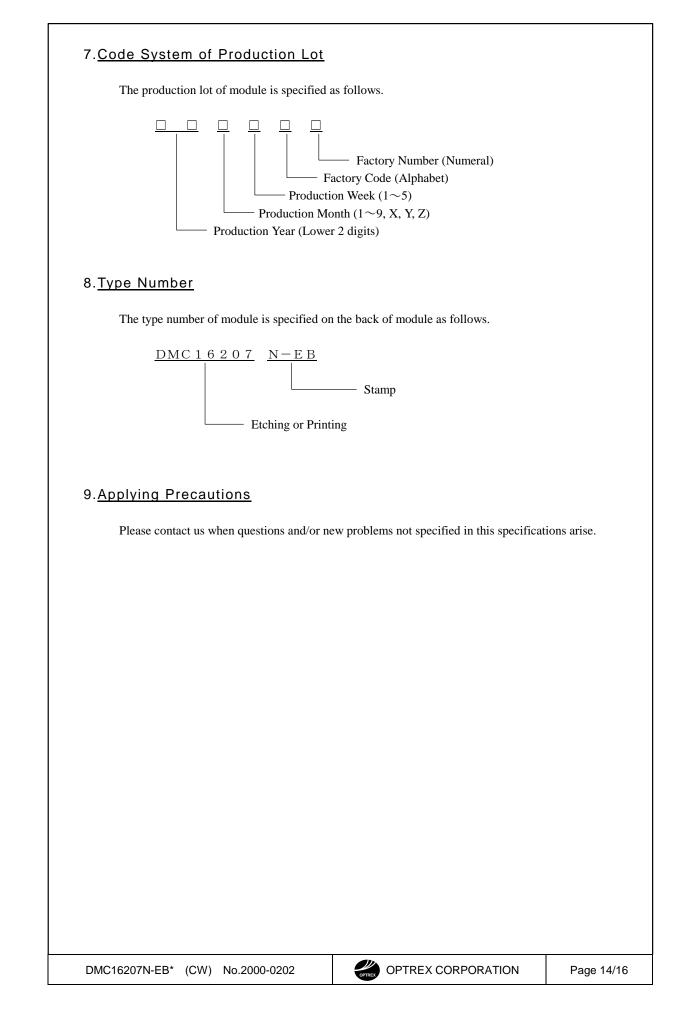

B Zone : Area from outside of "A Zone" to validity viewing area C Zone : Rest parts

A Zone + B Zone = Validity viewing area

10. Precautions Relating Product Handling

The Following precautions will guide you in handling our product correctly.

- 1) Liquid crystal display devices
- ① The liquid crystal display device panel used in the liquid crystal display module is made of plate glass. Avoid any strong mechanical shock. Should the glass break handle it with care.
- ② The polarizer adhering to the surface of the LCD is made of a soft material. Guard against scratching it.

2) Care of the liquid crystal display module against static electricity discharge.

- ① When working with the module, be sure to ground your body and any electrical equipment you may be using. We strongly recommend the use of anti static mats (made of rubber), to protect work tables against the hazards of electrical shock.
- ② Avoid the use of work clothing made of synthetic fibers. We recommend cotton clothing or other conductivity-treated fibers.
- ③ Slowly and carefully remove the protective film from the LCD module, since this operation can generate static electricity.
- 3) When the LCD module alone must be stored for long periods of time:
- ① Protect the modules from high temperature and humidity.
- ② Keep the modules out of direct sunlight or direct exposure to ultraviolet rays.
- ③ Protect the modules from excessive external forces.
- 4) Use the module with a power supply that is equipped with an overcurrent protector circuit, since the module is not provided with this protective feature.
- 5) Do not ingest the LCD fluid itself should it leak out of a damaged LCD module. Should hands or clothing come in contact with LCD fluid, wash immediately with soap.
- 6) Conduc1tivity is not guaranteed for models that use metal holders where solder connections between the metal holder and the PCB are not used. Please contact us to discuss appropriate ways to assure conductivity.
- 7) For models which use CFL:
- ① High voltage of 1000V or greater is applied to the CFL cable connector area. Care should be taken not to touch connection areas to avoid burns.
- 2 Protect CFL cables from rubbing against the unit and thus causing the wire jacket to become worn.
 3 The use of CFLs for extended periods of time at low temperatures will significantly shorten their service life.

8) For models which use touch panels:

①Do not stack up modules since they can be damaged by components on neighboring modules. ②Do not place heavy objects on top of the product. This could cause glass breakage.

- 9) For models which use COG,TAB,or COF:
 - ①The mechanical strength of the product is low since the IC chip faces out unprotected from the rear. Be sure to protect the rear of the IC chip from external forces.
 - ②Given the fact that the rear of the IC chip is left exposed, in order to protect the unit from electrical damage, avoid installation configurations in which the rear of the IC chip runs the risk of making any electrical contact.
- 10) Models which use flexible cable, heat seal, or TAB:

①In order to maintain reliability, do not touch or hold by the connector area.②Avoid any bending, pulling, or other excessive force, which can result in broken connections.

11. Warranty

This product has been manufactured to your company's specifications as a part for use in your company's general electronic products. It is guaranteed to perform according to delivery specifications. For any other use apart from general electronic equipment, we cannot take responsibility if the product is used in medical devices, nuclear power control equipment, aerospace equipment, fire and security systems, or any other applications in which there is a direct risk to human life and where extremely high levels of reliability are required. If the product is to be used in any of the above applications, we will need to enter into a separate product liability agreement.

- ① We cannot accept responsibility for any defect, which may arise from additional manufacturing of the product (including disassembly and reassembly), after product delivery.
- ② We cannot accept responsibility for any defect, which may arise after the application of strong external force to the product.
- ③ We cannot accept responsibility for any defect, which may arise due to the application of static electricity after the product has passed your company's acceptance inspection procedures.
- ④ When the product is in CFL models, CFL service life and brightness will vary according to the performance of the inverter used, leaks, etc. We cannot accept responsibility for product performance, reliability, or defect, which may arise.
- ⑤ We cannot accept responsibility for intellectual property of a third party, which may arise through the application of our product to your assembly with exception to those issues relating directly to the structure or method of manufacturing of our product.
- ⑥ Optrex will not be held responsible for any quality guarantee issue for defect products judged as Optrex-origin longer than 2 (two) years from Optrex production or 1(one) year from Optrex, Optrex America, Optrex Europe, Display LC delivery which ever comes later.

DMC16207N-EB*	(CW)	No.2000-0202
