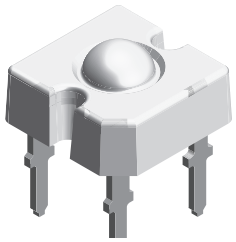
TELUX LED



DESCRIPTION

The TELUX series is a clear, non diffused LED for applications where supreme luminous flux is required.
It is designed in an industry standard 7.62 mm square package utilizing highly developed AlInGaP technology.
The supreme heat dissipation of TELUX™ allows applications at high ambient temperatures.
All packing units are binned for luminous flux, forward voltage and color to achieve the most homogenous light appearance in application.
SAE and ECE color requirements for automobile application are available for color red.

Note

- Luminous flux is tested at a current pulse duration of 25 ms and an accuracy of ± 11 %.
  These type numbers represent the order groups which include only a few brightness groups. Only one group will be shipped on each tube (there will be no mixing of two groups on each tube).

In order to ensure availability, single brightness groups will not be orderable.
In a similar manner for colors where wavelength groups are measured and binned, single wavelength groups will be shipped in any one tube.
In order to ensure availability, single wavelength groups will not be orderable.
