Cree® PLCC4 White SMD LED CLA2A-WKW
Data Sheet

SMD LEDs are packaged in the industry-standard package. These LEDs have high-reliability performance and are designed to work under a wide range of environmental conditions. This high-reliability feature makes them ideally suited to be used under illumination-application conditions.

Their wide viewing angle makes these LEDs ideally suited for channel letters or general backlighting and illumination applications. The flat-top emitting surface makes it easy for these LEDs to mate with light pipes.

Kit Number System

Cree LED lamps are tested and sorted into performance bins. A bin is specified by ranges of color, forward voltage, and brightness. Sorted LEDs are packaged for shipping in various convenient options. Please refer to the "Cree LED Lamp Packaging Standard" document for more information about shipping and packaging options.

Cree LEDs are sold by order codes in combinations of bins called kits. Order codes are configured in the following manner:
