Handling Precaution

The encapsulation material of the product is made of silicone for better reliability of the product. As silicone is a soft material, please do not press on the silicone or poke a sharp object onto the silicone. These might damage the product and cause premature failure. During assembly or handling, the unit should be held on the body (white epoxy).

This product is classified as moisture sensitive level 4

When the bag is opened, parts required to mount within 72 hours of factory conditions $\leq 30^\circ\text{C}/60\%$, and stored at $<10\%$ RH.

Devices required bake, before mounting if:

- The humidity indicator card is $> 10\%$ when read at $23 \pm 5^\circ\text{C}$
- The pack has been opened for more than 72 hours.

Baking recommended condition: $60 \pm 5^\circ\text{C}$ for 20 hours.
