

PART NUMBER: VF-D320-DXXXA

page 1 of 5date 06/2010

**DESCRIPTION:** switching power supply

#### features

- · power factor correction
- · power good signal
- · short circuit protection
- · over load protection
- · over voltage protection
- · over temperature protection
- · low leakage current 500 μA @ 240 V ac 300 μA @ 120 V ac (optional)
- approved to UL, CUL, TUV, CE with CB scheme
- · high power density: 8.9 watts/inch<sup>3</sup>
- · dual output

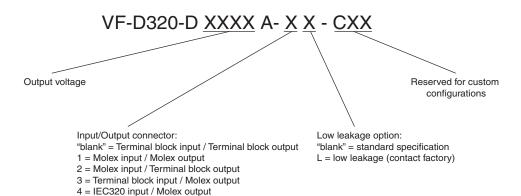

|                |                        | output                  | current             | ripple & ı              | noise <sup>5, 6</sup> |
|----------------|------------------------|-------------------------|---------------------|-------------------------|-----------------------|
| MODEL          | output <sup>1, 2</sup> | convection <sup>3</sup> | 18 CFM <sup>4</sup> | regulation <sup>5</sup> | (mVpp)                |
| VF-D320-D512A  | 5/12 V                 | 15/10.42 A              | 30/16.67 A          | ±5%                     | ±1%                   |
| VF-D320-D524A  | 5/24 V                 | 15/5.2 A                | 30/8.33 A           | ±5%                     | ±1%                   |
| VF-D320-D548A  | 5/48 V                 | 15/2.6 A                | 30/4.16 A           | ±5%                     | ±1%                   |
| VF-D320-D1224A | 12/24 V                | 12.5/6.25 A             | 16.67/8.33 A        | ±5%                     | ±1%                   |

#### notes

- 1 Output is fully isolated.
- 2 Output voltage is measured at output power connector.
- 3 150 W max combined power for  $\rm V_1$  and  $\rm V_2$  for VF-D320-D1224A, 125 W max. for all other models.
- 4 300 W max combined power for  $V_1$  and  $V_2$  for VF-D320-D1224A, 250 W max. for all other models.
- 5 1% minimum load is required to maintain the ripple and regulation.
- 6 Ripple and noise is measured from 10 KHz to 20 MHz at output terminals with a 0.1 μF ceramic capacitor and a 22 μF electrolytic capacitor in parallel.

5 = IEC320 input / Terminal block output

### **CUSTOM CONFIG KEY**

page 2 of 5date 06/2010

PART NUMBER: VF-D320-DXXXA DESCRIPTION: switching power supply

# **INPUT**

| parameter       | conditions/description                                    | min | nom | max | units |
|-----------------|---|-----|-----|-----|-------|
| input frequency |   | 47  |     | 63  | Hz    |
| input voltage   | 90-132 / 180-264 auto-selectable                          | 90  |     | 264 | VAC   |
| Input current   | At 100-120 VAC  |     |     | 8   | A     |
|                 | At 200-240 VAC  |     |     | 4   | A     |
| inrush current  | Peak measured at 230 VAC at full load, cold start         |     |     | 70  | A     |
|                 | Peak measured at 115 VAC at full load, cold start         |     |     | 35  | Α     |
| power factor    | Passive power factor correction meets EN61000-3-2 class A |     |     |     |       |

# **OUTPUT**

| parameter          | conditions/description   | min               | nom     | max        | units              |  |
|--------------------|--|-------------------|---------|------------|--------------------|--|
| transient response | Output voltage returns to within 1% in less than                 |                   |         |            |                    |  |
|                    | 2.5 mS for a 50% load change. Peak transient does not exceed 5%. |                   |         |            |                    |  |
| overshoot          | Turn-on and turn-off overshoot shall not exceed                  |                   |         |            |                    |  |
|                    | 5% over nominal voltage.   |                   |         |            |                    |  |
| efficiency         | Measured at 230 V and full load                                  | 75%               |         |            |                    |  |
| turn on delay      | At 120 VAC   |                   |         | 1          | second             |  |
| hold up time       | At 120 VAC and 80% of rated maximim load                         | 20                |         |            | ms                 |  |
| adjustability      | Adjustable with built-in trim pot.                               | +/- 5%            |         |            |                    |  |
| LED display        | When green (LED1) is on the power supply is operating normally.  |                   |         |            |                    |  |
| power good         | Designated as PG on the CN1. This signal                         |                   |         |            |                    |  |
|                    | goes TTL high 100-500 mS after the output reaches regulation.    |                   |         |            |                    |  |
|                    | It goes low at least 1 mS before loss of regulation.             |                   |         |            |                    |  |
| fan drive          | 12 VDC/400mA for external fan                                    |                   |         |            |                    |  |
| fan fail alarm     | Designated as FF on pin3 of CN1. Open collector ou               | tput rated for 15 | VDC/5mA | sink corre | ct. Goes high when |  |
|                    | fan failure is detected.   |                   |         |            |                    |  |

# **PROTECTION CIRCUIT**

| parameter           | conditions/description   |  |
|---------------------|--|--|
| input fuse          | Built-in ac fuse. A blown fuse usually indicates permanent   |  |
|                     | damage to the power supply serviceable by factory only.  |  |
| overload            | Current limiting starts at 110-140% of the rated output current in foldback mode and                   |  |
|                     | recovers automatically.  |  |
| short circuit       | Short circuit can be continuous. Recovers automatically upon removal of short.                         |  |
| output over-voltage | Output is protected agaist overvoltage. Unit shuts down and latches                                    |  |
|                     | when voltage at output terminals exceeds 130%. AC input needs to be                                    |  |
|                     | reset to restart the power supply.   |  |
| over temp.          | Power supply shuts down when temperature is in excess of 85 °C. Auto recovery.                         |  |
|                     | when voltage at output terminals exceeds 130%. AC input needs to be reset to restart the power supply. |  |

### **GENERAL AND SAFTEY**

| parameter         | conditions/description   | min     | nom | max | units |  |
|-------------------|--|---------|-----|-----|-------|--|
| operating temp.   | 0 to 70°C ambient, de-rating at 2.5% per degree                          | 0       |     | 70  | °C    |  |
|                   | from 50°C to 70°C.   |         |     |     |       |  |
| storage temp.     |  | -20     |     | 85  | °C    |  |
| operating humid.  | Non-condensing   | 5%      |     | 90% | RH    |  |
| storage humid.    | Non-condensing   | 5%      |     | 95% | RH    |  |
| EMI               | Pass FCC Part 15, CISPR 22 class B, Conducted                            |         |     |     |       |  |
| safety            | UL60950-1, CSA C22.2 No. 60950-1-03, TUV EN60950-1 and CB, CE Mark (LVD) |         |     |     |       |  |
|                   | EN61000-3-2, 3 & IEC61000-4 Series regulations and Cl                    | В       |     |     |       |  |
| leakage current   | at 240 VAC   |         |     | 1.5 | mA    |  |
| (optional)        | at 120 VAC   |         |     | 300 | uA    |  |
|                   | at 240 VAC   |         |     | 500 | uA    |  |
| vibration         | Acceleration ± 7.35 M/(SxS), on X, Y and Z Axis                          | 5       |     | 50  | Hz    |  |
| isolation voltage | Applied for 3 seconds at 10 mA max.                                      |         |     |     |       |  |
| (HI-POT)          | Primary to secondary:  | 3000    |     |     | VAC   |  |
|                   | Primary to transformer core:   | 1500    |     |     | VAC   |  |
|                   | Primary to chassis:  | 1500    |     |     | VAC   |  |
| grounding test    | Allowable resistance measured when 25 A current is                       |         |     | 0.1 | Ω     |  |
|                   | applied from the ground pin of the three prong plug                      |         |     |     |       |  |
|                   | to the farthest earthed connection point.                                |         |     |     |       |  |
| warranty          | Standard warranty length   |         |     | 2   | years |  |
| MTBF              | According to MIL-HDBK-217 at 30 °C                                       | 100,000 |     |     | hours |  |
| burn-in           | Full load, at 45 ± 5 °C, 230 VAC.  |         |     | 1   | hours |  |
| cooling           | Convection.  |         |     |     |       |  |

### **MECHANICAL**

| parameter | conditions/description | min | nom | max | units  |
|-----------|------------------------|-----|-----|-----|--------|
| weight    |                        |     |     | 600 | grams  |
| enclosure | 6(L) x 4(W) x 1.5(H)   |     |     |     | inches |

# **LOGIC SIGNAL CONNECTOR - (CN1)**

|           | $\mathcal{N}$   |  |
|-----------|---|--|
| parameter | conditions/description  |  |
| CN1       | JST B2B-XH-3 or equivalent (CHYAO SHIUNN JS-1001-03)                          |  |
|           | Suggested mating connector: JST XHP-3 or equivalent (CHYAO SHIUNN JS-2001-03) |  |
| RTN       | common (gnd) pin for PG and FF  |  |

### **FAN DRIVER CONNECTOR - (FAN2)**

| (************************************** |   |  |  |  |
|---|---|--|--|--|
| parameter                               | conditions/description  |  |  |  |
| FAN2                                    | Suggested mating connector: JST XHP-2 (2 pins 0.98 pitch) or equivalent (CHYAO SHIUNN JS-2001-02) |  |  |  |

# INPUT / OUTPUT CONNECTOR - (CN2)

| parameter | conditions/description   |  |  |
|-----------|--|--|--|
| option 1  | AC INPUT JST VH series (5 pin with pins 2 and 4 removed) or equivalent (Chyao Shiunn JS-1120-05) |  |  |
|           | Suggested mating plug: JST VHR-5N (5 pin) or equivalent (Chyao Shiunn JS-1121-05)                |  |  |
|           | contact: JST SVH series or similar   |  |  |
|           | DC OUTPUT JST VH series (10 pin) or equivalent (Chyao Shiunn JS-1120-10)                         |  |  |
|           | Suggested mating plug: JST VHR-10N (10 pin) or equivalent (Chyao Shiunn JS-1121-10)              |  |  |
|           | contact: JST SVH series or similar   |  |  |
| option 2  | Howder Terminal block Part No. HB-95-7P (7 pin, M3.5 Screw) 9.5mm spacing                        |  |  |
|           | Suggested mating connector: Molex 19198-0045 or similar  |  |  |
| RTN       | common (gnd) pin for $V_1$ and $V_2$   |  |  |
|           |  |  |  |

| Howder         | Molex           |
|----------------|-----------------|
| Pin 1: V1      | Pins 1 ~ 3: V1  |
| Pin 2 ~ 3: RTN | Pins 4 ~ 8: RTN |
| Pin 4: V2      | Pins 9 ~ 10: V2 |
| Pin 5: GND     | Pin 11: GND     |
| Pin 6: Neutral | Pin 13: Neutral |
| Pin 7: Line    | Pin 15: Line    |
