## **Plug & Play Power**

next generation power source

#### **Lowest Profile (1U) Highest Efficiency**

#### **FEATURES**

- up to 1200W multi-output power in 1U (40mm)
- 1.5V to 58V standard output voltages
- All outputs fully floating
- Plug & Play power module architecture
  - allows fast custom configurations
  - facilitates rapid prototyping
  - simplifies logistics
- Ultra-high efficiency up to 90%
- Series / Parallel of multiple outputs
- Visual LED indicators

#### **APPLICATIONS INCLUDE**

- Industrial machines
- Test and measurement
- Automation equipment
- Telecommunications
- Medical equipment
- Laboratory and Diagnostic equipment
- Audio and broadcast
- Linear and rotary motion
- 19" systems

Excelsys brings over 20 years experience of modular power supply development and applications together with the most modern product development and design techniques in the revolutionary Xgen series.

The Xgen series brings OEM power supplies to a new paradigm, combining technical excellence with logistics simplicity to fully resolve all the concerns regularly expressed by users of multiple-output power supplies. Xgen continues the Excelsys tradition of providing an instant, no compromise power solution for any application where a unique set of voltage and current requirements is needed.

#### Too much heat generated in your OEM equipment? Difficult to maintain your equipment at the right temperature?

#### **EFFICIENCY**

Xgen has industry-unrivalled efficiency, exceeding 90% !! This means that less than half of the amount of waste heat is created in comparison to conventional multiple output power sources with efficiencies of 80% and lower. It also guarantees increased reliability.

Now, that's a **cool** power supply!

#### Not enough space available in your OEM equipment? Is space at a premium, making design and manufacture difficult and compromised?

SPACE Xgen has industry-unrivalled power density for a full functionality ac/dc power supply, at 15W/in<sup>3</sup>. Check it out! You can get 1200W of multiple-output power source in 1U rack space - Xgen dimension: 40.4mm! It's so compact, you'll hardly notice it, once installed, and it leaves plenty more space for your other components and general accessibility.

Now, that's a discreet power supply!

#### Need a custom power supply in a hurry?

#### **CUSTOM POWER**

Xgen is a true Plug & Play multiple-output power supply. Any one of more than 30 million configurations can be assembled anywhere, in under 5 minutes, from standard, volume-produced modules. This is the new-paradigm: a custom power supply available in 5 minutes from standard parts.

Now, that's a *new paradigm* power supply!

#### Worried about meeting all relevant standards - EMC, Safety, etc?

#### **STANDARD APPROVALS**

Xgen series models are fully compliant with all relevant standards, Xcite, Xhite and Xgite models meet the requirements of EN60950, UL60950, CSA22.2, EN61000-3-x and EN61000-4-x. Additionally Xvite and Xmite models meet the requirements of EN60601-1 and UL2601 for medical applications.

CE c Now, that's a re-assuring power supply!

#### Looking for a cost-effective long term solution for all your power supply requirements?

#### COST-EFFECTIVE

Xgen is configured from standard component parts that are manufactured in volume in a world class manufacturing facility. This allows Excelsys to provide you with all the benefits of Xgen at a world class competitive price. Call Excelsys or one of our distributors and find out for yourself.

Now, that's an excellent value power supply!

#### Excelsys Development and Design Methodology

Excelsys has applied the most modern and rigorous processes and design techniques to development of the Xgen product range.

provide insensitivity to manufacturing variability

#### Voltage Adjustment - Local

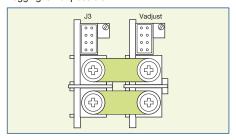

The multi-turn potentiometer that adjusts each output within the specified range may be accessed via the output panel of the power supply. Clockwise rotation increases output voltage. Resolution is approximately 5% of nominal voltage (Vnom) per turn.

#### Voltage Adjustment - Remote (resistive / electronic)

The output voltage may be adjusted or trimmed by means of an external resistor or potentiometer network connected to the Vtrim pin. Linear Electronic programming is also possible and may be implemented according to the formula Vout = K Vcontrol. See Xgen series Designers' Manual for full details.

#### **Paralleling**

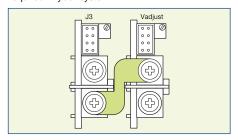

To achieve increased current capacity, simply parallel outputs using the standard parallel links. Excelsys 'wireless' sharing ensures that current hogging is not possible.

Standard parallel links can be supplied. To order, please use part number XP1.

#### Seriesing

To achieve increased output voltages, simply series outputs using standard series links, paying attention to the requirements to maintain SELV levels if required in your system.

Standard serial links can be supplied. To order, please use part number XS1.

#### **Remote Sensing**

When the load is remote from the power supply, the remote sense pins may be used to compensate for drops in the power leads. Where the power cabling contributes significant dynamic impedance, see Xgen series Designers' Manual.

#### **Bias Voltage**

A SELV isolated 5V (always on) bias voltage rated at 250mA is provided on J2 to facilitate miscellaneous control functions.

#### **Current Limit Adjustment**

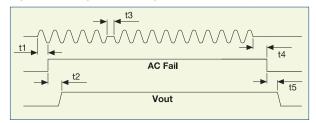

The output current limit setting may be adjusted (downwards only) by means of an external resistor connection to the I trim pin.

#### Inhibit/Enable

Inhibiting may be implemented either globally or on a per module basis (powerPac or powerMod inhibiting). Reverse logic (Enabling) may also be implemented, see Xgen series Designers' Manual.

#### **AC Fail**

Open collector signal indicating that the input voltage has failed or is less than 80Vac. This signal changes state giving 5mS of warning before loss of output regulation. See Xgen series Designers' Manual for full specifications.

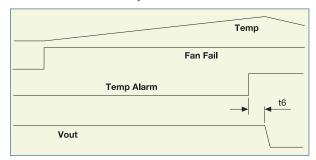

#### **Temperature Alarm (Option 01)**

Open collector signal indicating excessive *powerPac* temperatures due to fan failure or operation beyond ratings. This signal is activated at least 10ms prior to system shutdown.

#### Fan Fail (Option 01)

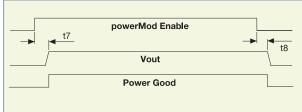

Open collector signal indicating that at least one of the system fans have failed. This does not cause system shutdown.

#### **Power Good**

Opto-isolated output signal indicates that the *powerMod* is operating correctly and output voltage is within normal band.

Opto transistor ON = Good.

#### **Indication LEDs**

Each powerMod has a visual indicator to identify that it is operating within normal ratings. Very useful for system diagnosis.

#### **Signal Connector Pinout**

| Pin |                |                 |              |
|-----|----------------|-----------------|--------------|
| 1   | common         | +sense          | +pg (V2)     |
| 2   | +5V bias       | -sense          | -pg (V2)     |
| 3   |                | V trim          | inhibit (V2) |
| 4   | ac fail        | I trim          | common (V2)  |
| 5   | fan fail*      | +inhibit/enable | +pg (V1)     |
| 6   | global enable  | -inhibit/enable | -pg (V1)     |
| 7   | temp alarm*    | +power good     | inhibit (V1) |
| 8   | global inhibit | -power good     | common (V1)  |

<sup>\*</sup>Option 01 only

<sup>\*\*</sup>See individual powerMod datasheets

The Xgen series power supplies combine feature-laden front-ends (*powerPacs*) with slide-in output converters (*powerMods*). The plug-together architecture facilitates 'instant' custom power solutions with industry leading 15W/in<sup>3</sup> power density and up to 90% conversion efficiency.

#### powerPacs (6slot package, 127mm wide)

| Family | MODEL | Watts |
|--------|-------|-------|
| Xcite  | XCA   | 400W  |
|        | XCB   | 700W  |
|        | XCC   | 1000W |
|        | XCD   | 1200W |

The Xhite family is designed specifically for extended temperature applications fully specified from -20°C to +70°C with no derating !!!

The X<sub>qite</sub> family is designed specifically for acoustic sensitive applications.

|     |       | MODEL | Watts |
|-----|-------|-------|-------|
|     | Xvite | XVA   | 400W  |
| Med |       | XVB   | 700W  |
| Σ   |       | XVC   | 1000W |
|     |       | XVD   | 1200W |
| 보   | Xhite | XHA   | 400W  |
|     |       | XHB   | 600W  |
| Q   | Xqite | XQA   | 400W  |
|     |       | XQB   | 900W  |

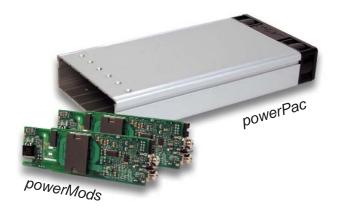

#### powerPacs (4slot package, 89mm wide)

| Family | MODEL |      |
|--------|-------|------|
| Xlite  | XLA   | 200W |
|        | XLB   | 400W |
|        | XLC   | 600W |

|     | Family | MODEL | Watts |
|-----|--------|-------|-------|
| ъ   | Xmite  | XMA   | 200W  |
| Мес |        | XMB   | 400W  |
| _   |        | XMC   | 600W  |

#### powerMods (for use with all powerPac models)

| •     | (          |              |              | ,        |            |
|-------|------------|--------------|--------------|----------|------------|
| MODEL |            |              |              |          |            |
| Xg1   | 1.5        | 2.5          | 3.6          | 50A      | 125W       |
| Xg2   | 3.2        | 5.0          | 6.0          | 40A      | 200W       |

#### **HOW TO ORDER**

**Configured Units** may be specified and ordered using the part numbering system shown opposite. For example, part number XVC123400-01 specifies the following 1000W medical power supply.

- 2.5V @ 50A 5V @ 40A 12V @ 20A 24V @ 10A
- Thermal signals suite fitted to powerPac

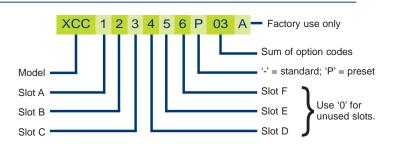

**Accessories** may be ordered directly using the part numbers shown.

| Part             | Part No. |                          |
|------------------|----------|--------------------------|
| Left Slot Cover  | XB1      | Note that unused slots   |
| Inner Slot Cover | XB2      | should be fitted with    |
| Right Slot Cover | XB3      | appropriate slot covers. |
| Series Link      | XS1      |                          |
| Parallel Link    | XP1      |                          |

**powerPacs** may be ordered directly using the model number shown in the tables followed by the appropriate option code suffix. E.g. XVB-01 is the part number for 700W *powerPac* with medical approval and thermal signals.

**powerMods** may be ordered directly using the model numbers shown in the powerMod table. E.g. Xg2 is the part number for a 5V 40A module.

**powerKits** consist of application specific *powerPacs* and a selection of *powerMods* packaged in a convenient carry case. Particularly useful for sytems designers. See *powerKit* datasheet.

#### **Xgen Option Codes**

- 01 Thermal Signals
- 02 Reverse Fan (not available on 1200W models)

#### **Preset Units**

Units are shipped with nominal output voltages unless presetting is specified. Excelsys can preset units to your exact requirements, through use of appropriate parallel and series links and through voltage adjustment to specific preset levels. See <a href="https://www.excelsys.com">www.excelsys.com</a> for more details.

#### **On-line Configuration and Ordering**

Now build your Xgen product on-line using our configuration wizard. Simply enter your Volts and Amps requirements and the wizard will do the rest.

#### **AC/DC Power Supply**

Ultra-high efficiency 1U size

PLUG & PLAY POWER next generation power source

#### **FEATURES**

- · 1.5V to 58V standard output voltages
- · All outputs fully floating
- Extra low profile: 1U height (40mm)
- Ultra high efficiency, up to 90%
- Plug & Play Power
  - allows fast custom configuration
  - allow easy logistics
- · Reduced system heat dissipation
- · Few electrolytic capacitors (all long life)
- Visual LED indicators
- Series / Parallel of multiple outputs
- 5V bias standby voltage provided
- · Individual output control signals

#### **APPLICATIONS INCLUDE**

- Industrial machines
- · Test and measurement
- Automation equipment
- Printing
- Telecommunications
- · For Medical applications see Xvite

The X<sub>cite</sub> family of power supplies provides up to an incredible 1200W in an extremely compact 1U x 260 x 127mm package. Boasting industry leading power density of 15W/in<sup>3</sup> and efficiencies of up to 90%, the X<sub>cite</sub> family employs an innovative plug & play architecture that allows users to instantly configure a custom power solution in less than 5 minutes!

Ultra high efficiencies and high power density are made possible through the combination of low loss technologies and the best field-proven technologies in planar magnetics and surface mount electronics. Significantly increased efficiency reduces system thermal load by more than 50%.

The X<sub>cite</sub> family consists of 4 *powerPac* models ranging in power levels from 400W to 1200W. Each model may be populated with up to 6 *powerMods* selected from the table of *powerMods* shown below.

All configurations carry full safety agency approvals, UL60950, EN60950 and are CE marked. For alternative power interfaces contact <a href="mailto:support@excelsys.com">support@excelsys.com</a>

#### **NOTES**

- 1. This product is not intended for use as a stand alone unit and must be installed by qualified personnel.
- 2. The specifications contained herein are believed to be correct at time of publication and are subject to change without notice.
- 3. All specifications at nominal input, full load, 25°C unless otherwise stated.

#### Slimline Power Supply

User Configurable 1U size

## PLUG & PLAY POWER next generation power source

#### **FEATURES**

- · Slimmest 400W configurable power
- Extra low profile: 1U height (40mm)
- · All outputs fully floating
- · Ultra high efficiency, up to 89%
- Plug & Play Power
  - allows fast custom configuration
  - allow easy logistics
- FLEXIMOUNT Flexible mounting system
- Few electrolytic capacitors (all long life)
- Visual LED indicators
- Series / Parallel of multiple outputs
- 5V bias standby voltage provided
- · Individual output control signals

#### **APPLICATIONS INCLUDE**

- Industrial machines
- · Test and measurement
- Automation equipment
- Printing
- Telecommunications
- For Medical applications see Xmite

The  $X_{\text{lite}}$  family of power supplies provides up to 600W in a slimline 1U x 260 x 89mm package. Providing up to 8 isolated outputs, the  $X_{\text{lite}}$  family is the most flexible power supply in its class and brings affordable configurable power to the 200-600W market.

The slimline product boasts unrivalled power density saving valuable system space. Combine with ultra high efficiencies, the X<sub>lite</sub> family provides system designers with flexible instant solutions that significantly shorten and simplify system design-in time.

The Xiite family consists of 3 *powerPac* models in 200W, 400W and 600W power levels. Each *powerPac* model may be populated with up to 4 *powerMods* selected from the table of *powerMods* shown below.

All configurations carry full safety agency approvals, UL60950, EN60950 and are CE marked. For alternative power interfaces contact <a href="mailto:support@excelsys.com">support@excelsys.com</a>

#### **NOTES**

- 1. This product is not intended for use as a stand alone unit and must be installed by qualified personnel.
- 2. The specifications contained herein are believed to be correct at time of publication and are subject to change without notice.
- 3. All specifications at nominal input, full load, 25°C unless otherwise stated.

#### **Medically Approved**

Ultra-high efficiency 1U size

PLUG & PLAY POWER next generation power source

#### **FEATURES**

- UL2601-1 and EN60601-1 approved
- Less than 300μA leakage current
- 4000VAC isolation
- Extra low profile: 1U height (40mm)
- Ultra high efficiency up to 90%
- Plug & Play Power
  - allows fast custom configuration
  - allow easy logistics
- · Reduced system heat dissipation
- · Few electrolytic capacitors (all long life)
- Visual LED indicators
- Series / Parallel of multiple outputs
- 5V bias standby voltage provided
- Individual output control signals

#### **APPLICATIONS INCLUDE**

- · Clinical diagnostic equipment
- Medical lasers
- · Dialysis equipment
- For Standard applications see Xcite

The Xvite family of medically approved power supplies provides up to an incredible 1200W in an extremely compact 1U x 260 x 127mm package. Providing up to 12 isolated DC outputs, the Xvite family employs innovative plug & play architecture allowing users to instantly configure a custom power solution in less than 5 minutes!

The Xvite family consists of 4 powerPacs ranging in power levels from 400W to 1200W and 7 powerMod DC output modules. Simply select the appropriate powerPac and up to 6 powerMods from the tables below to complete your custom power supply.

The X<sub>vite</sub> family boasts an industry leading power density of 15W/in<sup>3</sup> and ultra-high efficiencies (up to 90%). The significant system space savings and reduced heat dissipation radically simplify system design.

All configurations carry full safety agency approvals including UL2601-1and EN60601-1 and are CE marked. For alternative power interfaces contact <a href="mailto:support@excelsys.com">support@excelsys.com</a>

#### **NOTES**

- 1. This product is not intended for use as a stand alone unit and must be installed by qualified personnel.
- 2. The specifications contained herein are believed to be correct at time of publication and are subject to change without notice.
- 3. All specifications at nominal input, full load, 25°C unless otherwise stated.

#### **Medical Power Supply**

User Configurable 1U size

## PLUG & PLAY POWER next generation power source

#### **FEATURES**

- EN60601-1 and UL2601-1 approved
- Less than 300µA leakage current
- 4000VAC isolation
- Slimmest 600W configurable power
- Extra low profile: 1U height (40mm)
- Ultra high efficiency, up to 89%
- Plug & Play Power
  - allows fast custom configuration
  - allow easy logistics
- FLEXIMOUNT Flexible mounting system
- Few electrolytic capacitors (all long life)
- Series / Parallel of multiple outputs
- · 5V bias standby voltage provided
- · Individual output control signals

#### **APPLICATIONS INCLUDE**

- Radiological imaging
- Clinical diagnostics
- Medical lasers
- Clinical chemistry
- For non-medical applications see Xlite

The X<sub>mite</sub> family of medically approved power supplies provides up to 600W in a slimline 1U x 260 x 89mm package. The X<sub>mite</sub> family carries full safety agency approvals to EN60601-1 and UL2601-1, meeting the stringent creepage requirements in this compact package. Providing up to 8 isolated outputs, the X<sub>mite</sub> family is the most flexible power supply in its class and brings affordable configurable power to the 200-600W medical market.

The X<sub>mite</sub> family consists of 3 *powerPac* models in 200W, 400W and 600W power levels. Each *powerPac* model may be populated with up to 4 *powerMods* selected from the table of *powerMods* shown below. Simply select your appropriate *powerPac* and *powerMods* to get your instant custom power solution.

This slimline product boasts unrivalled power density, providing significant system space savings. Combined with ultra-high efficiencies, the X<sub>mite</sub> family provides system designers with flexible instant solutions that significantly shorten system design-in time. For alternative power interfaces contact <a href="mailto:support@excelsys.com">support@excelsys.com</a>

#### **NOTES**

- 1. This product is not intended for use as a stand alone unit and must be installed by qualified personnel.
- 2. The specifications contained herein are believed to be correct at time of publication and are subject to change without notice.
- 3. All specifications at nominal input, full load, 25°C unless otherwise stated.

# gen Series powerKit

#### **Ultimate in Plug & Play Power**

your dreams come true!

## PLUG & PLAY POWER next generation power source

#### **FEATURES**

- Make your own custom power supply!
- 1.5V to 58V standard output voltages
- · Only available from Excelsys
- Straight line or Foldback current limit
- Output inhibit/enable control
- Parallel powerMods for higher current
- · Series powerMods for higher voltages
- Available in application specific kits

#### **EACH powerKit CONTAINS**

- One powerPac
- Seven powerMod dc output modules
- Xgen Designers' Manual
- Two pairs of parallel links (XP1)
- Two series links (XS1)
- · Power & Signal mating connectors
- · Quality posi screwdriver
- Quality Voltage adjustment tool

The powerKit family from the Excelsys Xgen series brings user convenience to a new paradigm for system design engineers tasked with development of system power supply solutions. The powerKit contains an application specific powerPac chassis module, along with a selection of user installable plug-in powerMod dc output modules. Each powerMod can be simply plugged in, removed and exchanged offering a remarkably powerful flexible system solution. Truly, for system design engineers, your dreams come true!

The feature-rich *powerMods* provide a suite of output signals and user configurable functions increasing design-in flexibility. User configurable functions include local and remote adjustment, adjustable current limit, alternative current limiting technique and inhibit/enable functions.

Employing high efficiency conversion techniques, Xgen series *powerMods* and *powerPacs have* minimal power losses, while the advanced packaging makes the Xgen series the smallest power supply in the industry.

#### powerKits

| MODEL | powerPac | Power | Application | Slots | Ref                 |
|-------|----------|-------|-------------|-------|---------------------|
| XKC   | Xcite    | 1200W | Standard    | 6     | see Xcite datasheet |
| XKV   | Xvite    | 1200W | Medical     | 6     | see Xvite datasheet |
| XKH   | Xhite    | 600W  | Hi-Temp     | 6     | see Xhite datasheet |
| XKQ   | Xqite    | 900W  | Low Noise   | 6     | see Xqite datasheet |
| XKL   | Xlite    | 600W  | Standard    | 4     | see Xlite datasheet |
| XKM   | Xmite    | 600W  | Medical     | 4     | see Xmite datasheet |

#### Each powerKit model contains ONE of each of the following powerMods

| MODEL            |            | Vnom         |              |          |          | Type |            |
|------------------|------------|--------------|--------------|----------|----------|------|------------|
| Xg1              | 1.5        | 2.5          | 3.6          | 50A      | 0A       | Α    | 125W       |
