Kit Contents

- CY8C22545 Emulation Pod

Hardware Description

The CY3250-22545-POD emulation pod kit provides developers with a solution for debugging CY8C22545 projects. This kit provides only replacement pods for the specified PSoC family. The CY8C22545 device is designed to provide a sufficient amount of memory and peripheral resources for use in CapSense™ applications, but are also capable of handling a wide range of applications found in the general-purpose microcontroller market.
