

To our customers,

---

## Old Company Name in Catalogs and Other Documents

---

On April 1<sup>st</sup>, 2010, NEC Electronics Corporation merged with Renesas Technology Corporation, and Renesas Electronics Corporation took over all the business of both companies. Therefore, although the old company name remains in this document, it is a valid Renesas Electronics document. We appreciate your understanding.

Renesas Electronics website: <http://www.renesas.com>

Renesas Electronics Corporation

Issued by: Renesas Electronics Corporation (<http://www.renesas.com>)

Send any inquiries to <http://www.renesas.com/inquiry>.

## Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: “Standard”, “High Quality”, and “Specific”. The recommended applications for each Renesas Electronics product depends on the product’s quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as “Specific” without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as “Specific” or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is “Standard” unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.
  - “Standard”: Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.
  - “High Quality”: Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
  - “Specific”: Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) “Renesas Electronics” as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) “Renesas Electronics product(s)” means any product developed or manufactured by or for Renesas Electronics.

# M38C29T-ADF

Temporary Target Board for M38C29RLFS

## User's Manual

### Keep safety first in your circuit designs!

- Renesas Technology Corporation and Renesas Solutions Corporation put the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage. Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of nonflammable material or (iii) prevention against any malfunction or mishap.

### Notes regarding these materials

- These materials are intended as a reference to assist our customers in the selection of the Renesas Technology product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Renesas Technology Corporation, Renesas Solutions Corporation or a third party.
- Renesas Technology Corporation and Renesas Solutions Corporation assume no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.
- All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Renesas Technology Corporation and Renesas Solutions Corporation without notice due to product improvements or other reasons. It is therefore recommended that customers contact Renesas Technology Corporation, Renesas Solutions Corporation or an authorized Renesas Technology product distributor for the latest product information before purchasing a product listed herein. The information described here may contain technical inaccuracies or typographical errors. Renesas Technology Corporation and Renesas Solutions Corporation assume no responsibility for any damage, liability, or other loss rising from these inaccuracies or errors. Please also pay attention to information published by Renesas Technology Corporation and Renesas Solutions Corporation by various means, including the Renesas home page (<http://www.renesas.com>).
- When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products. Renesas Technology Corporation and Renesas Solutions Corporation assume no responsibility for any damage, liability or other loss resulting from the information contained herein.
- Renesas Technology semiconductors are not designed or manufactured for use in a device or system that is used under circumstances in which human life is potentially at stake. Please contact Renesas Technology Corporation, Renesas Solutions Corporation or an authorized Renesas Technology product distributor when considering the use of a product contained herein for any specific purposes, such as apparatus or systems for transportation, vehicular, medical, aerospace, nuclear, or undersea repeater use.
- The prior written approval of Renesas Technology Corporation and Renesas Solutions Corporation is necessary to reprint or reproduce in whole or in part these materials.
- If these products or technologies are subject to the Japanese export control restrictions, they must be exported under a license from the Japanese government and cannot be imported into a country other than the approved destination. Any diversion or reexport contrary to the export control laws and regulations of Japan and/or the country of destination is prohibited.
- Please contact Renesas Technology Corporation or Renesas Solutions Corporation for further details on these materials or the products contained therein.

### Precautions to be taken when using this product

- This product is a development supporting unit for use in your program development and evaluation stages. In mass-producing your program you have finished developing, be sure to make a judgment on your own risk that it can be put to practical use by performing integration test, evaluation, or some experiment else.
- In no event shall Renesas Solutions Corporation be liable for any consequence arising from the use of this product.
- Renesas Solutions Corporation strives to renovate or provide a workaround for product malfunction at some charge or without charge. However, this does not necessarily mean that Renesas Solutions Corporation guarantees the renovation or the provision under any circumstances.
- This product has been developed by assuming its use for program development and evaluation in laboratories. Therefore, it does not fall under the application of Electrical Appliance and Material Safety Law and protection against electromagnetic interference when used in Japan.

### CAUTION

If the requirements shown in the "CAUTION" sentences are ignored, the equipment may cause personal injury or damage to the products.

Renesas Tools Homepage <http://www.renesas.com/en/tools>

# 1. Things to Check When Unpacking

The M38C29T-ADF package consists of the following products. When unpacking your package, check to see that all of these components are included.

If you find any item missing or faulty, or any suggestion, contact your local distributor.

Table 1.1 Package components

Item
M38C29T-ADF temporary target board
M38C29T-ADF User's Manual (this manual)

# 2. Outline

The M38C29T-ADF is a temporary target board used to develop software with a compact emulator M38000T2-CPE or PC4701 emulator system. It supplies to the M38C29RLFS MCU the minimum required signals needed to operate the emulator MCU, including power supply voltage, clock signals and reset signals. Use it when the user system is not ready.

# 3. Specifications

Table 3.1 lists the specifications of the M38C29T-ADF.

Table 3.1 Specifications

Applicable MCU	M38C29RLFS	
Clock	4.0MHz oscillator mounted (oscillator circuit board OSC-2 used) 32.768kHz (can be disconnected by SW1)	
Vcc	Supplied separately*	
Vss	Supplied separately	
RESET	- Reset circuit mounted (power-on reset and reset switch) - Connects the reset output of an emulation pod	
External dimensions	Width	90mm
	Depth	115mm
Others	Universal part prepared	

\* Power cannot be supplied from the emulator (e.g. M38000T2-CPE). A separate power supply is needed.

## 4. Setting Up

This chapter describes how to set up the M38C29T-ADF.

- (1) Mount the emulator MCU on the M38C29T-ADF.  
After checking the position of the No. 1 pin of the emulator MCU, mount the emulator MCU referencing Figure 4.1.
- (2) Insert the connector on the tip of the emulator probe to the socket on the emulator MCU.  
For the M38000T2-CPE, the converter board PCA4933 is required between the emulator probe and emulator MCU.

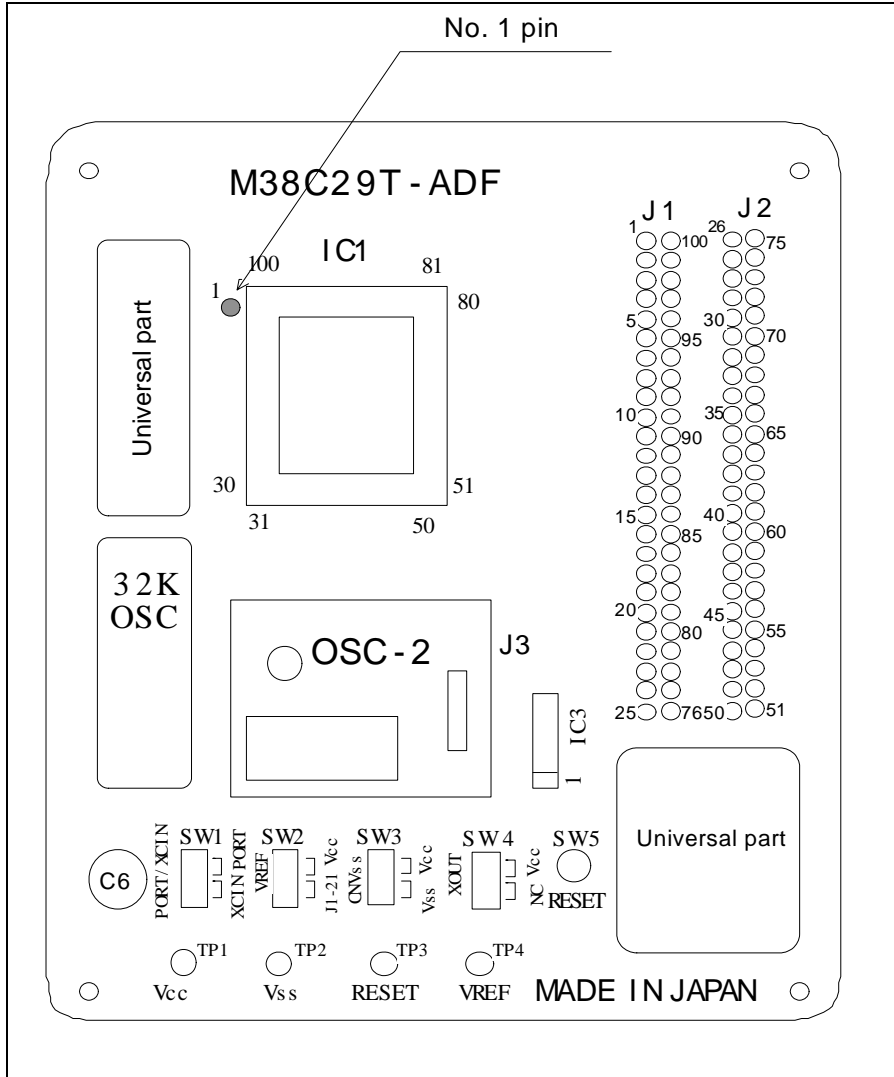

Figure 4.1 Position of No. 1 pin of the M38C29T-ADF's emulator MCU

### ⚠ CAUTION

#### Cautions to Be Taken for This Product:

- Always shut OFF power before connecting this product. The power ON state could destroy internal circuit.

- (3) Connect the RESET cable (white) and the GND cable (black) of the emulation pod to the RESET (TP3) pin and Vss (TP2) pin of the M38C29T-ADF respectively. And connect the Vcc cable (red) to the Vcc (TP1) pin.
- (4) Set the MCU type select switch of the M3800T2-CPE to the RLSS side.
- (5) Connect a power supply (not included) to the Vcc (TP1) pin of the M38C29T-ADF. And connect the GND output of the power supply to the Vss (TP2) pin. Use the power supply whose rising time is 10ms or less.

Table 4.1 lists the correspondence of the connector cables and signals, and Figure 4.2 shows the connection pattern.

Table 4.1 Connector cables of the M3800T2-CPE and applicable signals

Cable color	Signal
WHITE	RESET
BLACK	Vss
RED	Vcc (SENSE)

Figure 4.2 Connection pattern of the M38C29T-ADF

(6) Setting SW

Set the SW1 to SW4 according to your application. Table 4.2 describes the functions of the SW1 to SW4.

Table 4.2 Functions of the SW1, SW2, SW3 and SW4 of the M38C29T-ADF

No.	Name	Function	Factory-setting
SW1	PORT/XCIN	Allows you to choose whether to supply the sub-clock signals (32.768kHz) to the MCU's XCIN pin (pin 43). To use P61/XCIN as an output port, choose the PORT side. To use the sub-clock signals, choose the XCIN side.	PORT
SW2	VREF	Allows you to choose whether to apply Vcc or some other source to the MCU's VREF pin (pin 21). In the case of the latter, choose the J1-21 side, and apply a voltage within a prescribed range to the J1-21.	Vcc
SW3	CNVss	Allows you to choose which to connect, Vcc or Vss, to the MCU's CNVss pin (pin 39).	Vss
SW4	XOUT	Allows you to choose whether to pull up the MCU's XOUT pin (pin 46). To use the oscillator circuit of OSC-2 on the temporary target board, or to input the external clock, set SW4 to Vcc to pull up XOUT pin. To use the oscillator circuit with a resonator between XIN and XOUT, set SW4 to NC.	Vcc

## 5. Oscillator Circuit

### 5.1 Oscillator Circuit Board

The M38C29T-ADF has a built-in oscillator circuit board on which a 4.0MHz oscillator is mounted.

Figure 5.1 shows an external view of the OSC-2 oscillator circuit board (bare board) and where connector pins are located. Figure 5.2 shows the circuitry of the OSC-2 oscillator circuit board (bare board). Use the number of oscillator circuits recommended by the oscillator manufacturer.

Figure 5.1 External view of the oscillator board (OSC-2) and connector pin assignment

Figure 5.2 Circuit of the oscillator board (OSC-2)

### 5.2 32.768kHz Oscillator Circuit

The 32.768kHz oscillator circuit is prepared on the M38C29T-ADF. When using the 32.768kHz oscillator circuit as a sub-clock, set SW1 to the XCIN side.

## 6. Reset Circuit

Figure 6.1 shows the reset circuit and its waveform. In this product, reset is cleared in about 100ms from the instant Vcc passes about 2.1V after having started from 0 V. When Vcc drops down to about 2.1V, reset turns effective.

Figure 6.1 Reset circuit and its waveform

By using SW5, the MCU can be reset manually.

Table 6.1 Function of SW5 (reset switch)

No.	Name	Function
SW5	RESET	This is the reset switch. Press down this switch to reset the MCU.

# 7. Pin Layout

Figure 7.1 shows the pin layout of the M38C29T-ADF.

Figure 7.1 Pin layout of the M38C29T-ADF
