Embedded Systems Conference 2010 Edition

Renesas Electronics Corporation—the new company resulting from the April 1, 2010 merger of Renesas Technology Corporation and NEC Electronics Corporation—is a global semiconductor powerhouse offering a wide range of advanced solutions for a huge customer base around the world. Besides being the world's top supplier of microcontrollers with a 30% market share*, we are also a premiere supplier of SoC products, analog/mixed-signal chips, power devices and much more.

New and existing customers gain significant advantages from the unprecedented strength, extensive technology assets, and clear business focus made possible by our recent merger and invigorated corporate structure.

- ▶ Renesas' microcontroller architectures are #1 across diverse markets, and their extensive use and broad support both facilitate successful system designs and reduce engineering risk.
- ▶ Access to the state-of-the-art design and production technologies of the two biggest Japanese semiconductor companies drives solid product roadmaps and sparks innovation, while top-level commitments to customers protect engineering investments in our existing architectures.
- ▶ Being one of the few chipmakers now supporting an ITDM (Integrated Device and Technology Manufacturer) business model, Renesas Electronics Corporation provides exceptional levels of quality and flexibility by maintaining total control over all aspects of the products we produce: semiconductor R&D, chip design, and device production, including processing, packaging and testing.
