Assemble the hardware by connecting a development board to the interface board. This board is intended for use with an Accelerometer Interface Board, purchased separately. More information can be found on the Web site.

At www.freescale.com/
sensortoolbox download
the latest software version by
clicking the link.

Download Software

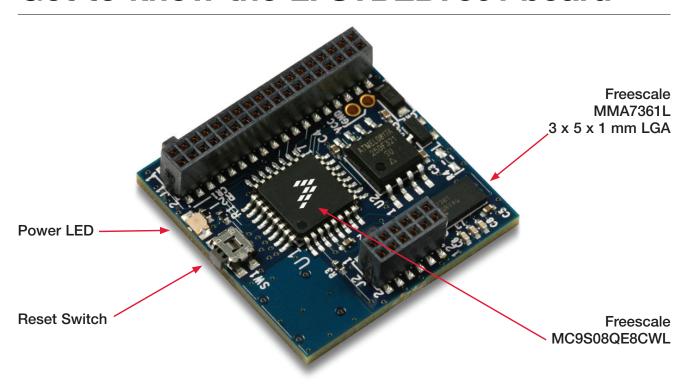

All Sensor Toolbox kits use the same software and driver, so the install only needs to be done once. Follow the on-screen instructions to install the communication driver for the tool. Check back occasionally for software updates.

Plug in the USB and turn the board on using the power switch. Run the Sensor Toolbox link on your desktop.
