Notes:

1. The thickness of all applicable panels ranges from 1.0 to 3.5 mm .039 to .138 inch.

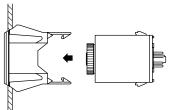

2. \* indicates the distance between the mounting holes which are parallel cut on the panel.

## Installation

1. Insert the mounting frame surface into the panel from its front surface.

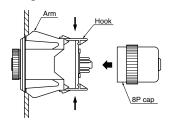

Note: The panel which is installed onto the flush type mounting frame for the timer cannot be inserted. (However, the installation order is not specified when the flush type mounting frame (type S) is used.)

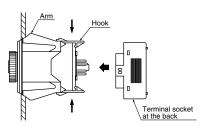

2. After installing the panel, insert the timer to be used from the back of the panel.

When an applicable timer comes in contact with the collar of the mounting frame, stop the timer by pressing the upper and lower hooks in the direction indicated by arrow. Use the terminal socket at the back (AT78041) or the 8P cap (AD8-RC) for the connection wiring.

#### 3. Hang the hooks on the timer base to secure the timer to the flush type mounting frame.

Press the points on the protective cover

(indicated by arrows) to bend the ribs,

and hook the ribs inside the mounting

be installed if the timer is inserted into

the mounting frame.

### Removal

Remove the timer in the reverse order of installation.

## **Compact timer** protective cover

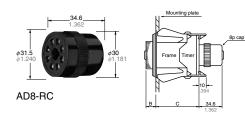

### Features

1. The cover prevents the timer from operating improperly after setting the time. It also works as a compact dust cover.

2. The cover is applicable for all types of the fingertip flush type mounting frames for the compact timer.

The dimensions B and C are shown in the table below. (Unit: mm, inch)

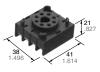

| Mounting frame to be used        | Dimension<br>B | Dimension<br>C |
|----------------------------------|----------------|----------------|
| Туре Н<br>Туре К                 | 13.1           | 52.8           |
| Type MHP<br>Type MHP-M<br>Type S | 14.6           | 51.3           |

Rear terminal socket: M3.5

The terminal socket can be used for two installation methods for the back and the front!

Tolerance: ±0.3 ±.012
