

Product Facts

- Designed to be the lowest cost sealed contactor in the industry with its current rating (500+A carry, 2000A interrupt at 320Vdc).
- Available with bottom or side mounting -- not position senstive.
- Optional auxiliary contact for easy monitoring of power contact position.
- Hermetically sealed intrinsically safe, operates in explosive/harsh environments with no oxidation or contamination of coils or contacts, including long periods of non-operation.
- Typical applications include battery switching and backup, DC voltage power control, circuit protection and safety.
- Versatile coil/power connections.
- Designed and built in accordance to AIAG QS9000.

Estimated Make & Break Power Switching Ratings

NOTES:

For resistive loads with 300µH maximum inductance. Consult factory for inductive loads.
Estimates based on extrapolated data. User is encouraged to confirm performance in application.
End of life when dielectric strength between terminals falls below 50 megohms @ 500VDC.
The maximum make current is 650A to avoid contact welding.
