

## Mechanically Latching Relays Based on the MM Power Relay

- Low power consumption due to mechanical latch for economic operation.
- Relays with mixed coil specifications can be produced (e.g., AC set coil and DC reset coil).
- Operational response fast enough to enable pulse signal power applications.
- Ambient operating temperature:  $-10^{\circ}\text{C}$  to  $55^{\circ}\text{C}$ .

Refer to Safety Precautions for All Relays.

## Ordering Information

Conforming to auxiliary power relay specifications	DPDT+DPST-NO	---	---	MM4KP-JD MM4XKP-JD

## Models Conforming to Auxiliary Power Relay Specifications

The MM4KP-JD and MM4XKP-JD satisfy the ratings of auxiliary relays provided in JEC-2500 (1987) standards for power protective relays specified by the Japan Electromechanical Commission. Furthermore, the MM4KP-JD and MM4XKP-JD satisfy the ratings of multi-contact relays provided in JEC-174D (1979) standards for power auxiliary relays.

These models work at operation level A specified by JEC-174D (1979) standards and the hot start of the relays is possible after the coils radiate heat.

In accordance with JEC-2500 (1987) standards, the coil of each model withstands a 130% DC load or 115% AC load.

**Note:** When ordering, add the rated coil voltage to the model number. Rated coil voltages are given in the coil ratings table.

Example: MM2K,  $\frac{6}{\text{---}}$  VAC  
Rated coil voltage

## Available Models

### Open Coils (with Solder Terminals)

Type	Contact form	Relay model	Available rated voltage
Standard	DPDT	MM2K	100/(110), 200/(220) VAC 12, 24, 48, 100/110, 200/220 VDC
	3P3T	MM3K	100/(110), 200/(220) VAC 48, 100/110 VDC
	DPDT+DPST-NC	MM4K	200/(220) VAC 12, 24, 48, 100/110, 200/220 VDC
DC-switching	DPDT	MM2XK	24, 100/110 VDC
	3P3T	MM3XK	200/(220) VAC 100/110 VDC
	DPDT+DPST-NC	MM4XK	100/(110) VAC 100/110 VDC

## Open Coils (with Screw Terminals)

Type	Contact form	Relay model	Available rated voltage
Standard	DPDT	MM2KB	100/(110), 200/(220) VAC 12, 24, 48, 100/110 VDC
	3P3T	MM3KB	100/(110), 200/(220) VAC 12, 48, 100/110 VDC
	DPDT+DPST-NC	MM4KB	24, 100/(110), 200/(220) VAC 100/110 VDC
DC-switching	DPDT	MM2XKB	100/(110), 200/(220) VAC 12, 24, 48, 100/110, 200/220 VDC
	3P3T	MM3XKB	200/(220) VAC 24, 100/110 VDC
	DPDT+DPST-NC	MM4XKB	24, 48, 100/110, 125, 200/220 VDC

## Cased Coils (Plug-in Terminals)

Type	Contact form	Relay model	Available rated voltage
Standard	DP	MM2KP	6, 12, 24, 100/(110), 200/(220) VAC 12, 24, 48, 100/110, 125, 200/220 VDC
	3P	MM3KP	24, 100/(110), 200/(220) VAC 6, 12, 24, 48, 100/110, 125, 200/220 VDC
	4P	MM4KP	24, 100/(110), 200/(220) VAC 6, 12, 24, 48, 100/110, 125, 200/220 VDC
DC-switching	DP	MM2XKP	24, 100/(110), 200/(220) VAC 12, 24, 48, 100/110, 125, 200/220 VDC
	3P	MM3XKP	100/(110), 200/(220) VAC 24, 48, 100/110, 125, 200/220 VDC
	4P	MM4XKP	100/(110), 200/(220) VAC 6, 12, 24, 48, 100/110, 125, 200/220 VDC
Conforming to auxiliary power relay specifications	4P	MM4KP-JD	24, 100/(110), 115, 200/(220) VAC 24, 100/110, 125, 200/220 VDC
Conforming to auxiliary power relay specifications for DC-switching	4P	MM4XKP-JD	100/(110), 115, 200/(220) VAC 24, 48, 100/110, 125, 200/220 VDC

	24	195	160	170	145	320	275	290	250	19	8.2			
	50	94	78	82	70	154	132	140	120	82	34			
	100/ (110)	47	39/45	41	35/40	77	66/76	70	60/68	340	141			
	200/ (220)	23.5	19.5/ 22.5	20.5	17.5/ 20	38.5	33/38	35	30/34	1,540	563			
DC	6	340				450				17.5	13.4	80% max.	110%	DP: Approx. 2.1 3P, 4P: Approx. 2.7
	12	176				220				68	54			
	24	87				94				275	255			
	48	41				52				1,180	930			
	100/ 110	17/19				22/24.5				5,750	4,500			
	200/ 220	8.6/9.5				11/12				23,200	18,000			

- Note:**
- The rated current and coil resistance are measured at a coil temperature of 23°C with tolerances of +15%/–20% for AC rated current and ±15% for DC coil resistance.
  - Performance characteristic data are measured at a coil temperature of 23°C.
  - The AC coil resistance values are reference values.
  - The maximum voltage is one that is applicable instantaneously to the Relay coil at an ambient temperature of 23°C and not continuously.
- \*Values in parentheses are for open relays.

## Reset Coil

	Rated voltage (V)	Rated current (mA)		Coil resistance (Ω)	Reset voltage	Maximum voltage	Power consumption (VA or W)
		50 Hz	60 Hz		% of rated voltage		
AC	6	770	690	2.3	80% max.	110%	Initial: Approx. 6.5 Rated: Approx. 4.1
	12	385	345	9.2			
	24	191	170	35			
	50	92	82	175			
	100/(110)	46	41/46	739			
	200/(220)	23	20/23	3,030			
DC	6	422		14.2			Approx. 2.8
	12	215		56			
	24	109		220			
	48	58		832			
	100/110	25/27		4,040			
	200/220	12.2/13.5		16,330			

- Note:**
1. The rated current and coil resistance are measured at a coil temperature of 23°C with tolerances of +15%/–20% for AC rated current and ±15% for DC coil resistance.
  2. Performance characteristic data are measured at a coil temperature of 23°C.
  3. The AC coil resistance values are reference values.
  4. The maximum voltage is one that is applicable instantaneously to the Relay coil at an ambient temperature of 23°C and not continuously.

## Coils (Conforming to Auxiliary Power Relay Specifications)

	Rated voltage (V)	Rated current (mA)				Coil resistance (Ω)		Set voltage	Reset voltage	Max. voltage	Operation level (JEC-174D)	Power consumption (VA or W)

- Note:**
1. The rated current and coil resistance are measured at a coil temperature of 23°C with tolerances of +15%/–20% for AC rated current and ±15% for DC coil resistance.
  2. The AC coil resistance and coil inductance values are for reference only.
  3. Performance characteristic data are measured at a coil temperature of 23°C.
  4. The maximum voltage is one that is applicable instantaneously to the Relay coil at an ambient temperature of 23°C and not continuously.

## ■ Contact Ratings

### Standard Relays

Item	Open Relays: MM2K(B), MM3K(B), MM4K(B)		Cased Relays: MM2KP, MM3KP, MM4KP	
	Resistive load ( $\cos\phi = 1$ )	Inductive load ( $\cos\phi=0.4, L/R=7\text{ ms}$ )	Resistive load ( $\cos\phi = 1$ )	Inductive load ( $\cos\phi=0.4, L/R=7\text{ ms}$ )
Contact mechanism	Single			
Contact material	Ag			
Rated load	10 A at 220 VAC 7 A at 24 VDC		5 A at 220 VAC 4 A at 24 VDC	
Rated carry current	10 A		5 A	
Max. switching voltage	250 VAC, 250 VDC		250 VAC, 250 VDC	
Max. switching current	10 A		5 A	
Max. switching power (reference value)	2,200 VA, 168 W		1,100 VA, 96W	

### DC-switching Relays

Item	Open Relays: MM2XK(B), MM3XK(B), MM4XK(B)		Cased Relays: MM2XKP, MM3XKP, MM4XKP	
	Resistive load ( $\cos\phi = 1$ )	Inductive load ( $\cos\phi=0.4, L/R=7\text{ ms}$ )	Resistive load ( $\cos\phi = 1$ )	Inductive load ( $\cos\phi=0.4, L/R=7\text{ ms}$ )
Contact mechanism	Single			
Contact material	Ag			
Rated load	7 A at 110 VDC	6 A at 110 VDC	5 A at 110 VDC	
Rated current flow	10 A		5 A	
Max. switching voltage	250 VAC, 250 VDC		250 VAC, 250 VDC	
Max. switching current	10 A		5 A	
Max. switching power (reference value)	800 W, 20 VA	660 W, 20 VA	700 W, 20 VA	600 W, 20 VA

- Note:** 1. When switching DC inductive loads at 125 V or more, an unstable region exists for a switching current of between 0.5 and 2.5 A. The Relay will not turn OFF in this region. Use a switching current of 0.5 A or less when switching 125 VDC or more.
2. If L/R exceeds 7 ms when switching DC inductive loads, an arc-breaking time of up to 50 ms must be considered in application and the circuit must be designed to ensure that an arc-breaking time of 50 ms is not exceeded.

### Contacts (Conforming to Auxiliary Power Relay Specifications)

Item	MM4KP-JD		MM4XKP-JD	
	Resistive load ( $\cos\phi = 1$ )	Inductive load ( $\cos\phi = 0.4, L/R= 7\text{ ms}$ )	Resistive load ( $\cos\phi = 1$ )	Inductive load ( $\cos\phi = 0.4, L/R= 7\text{ ms}$ )
Contact mechanism	Single			
Contact material	Ag			
Rated load	5 A at 220 VAC, 4 A at 24 VDC		5 A at 110 VDC	
Rated carry current	5 A			
Max. switching voltage	250 VAC, 250 VDC			
Max. switching current	5 A			

- Note:** 1. When switching DC inductive loads at 125 V or more, an unstable region exists for a switching current of between 0.5 and 2.5 A. The Relay will not turn OFF in this region. Use a switching current of 0.5 A or less when switching 125 VDC or more.
2. If L/R exceeds 7 ms when switching DC inductive loads, an arc-breaking time of up to 50 ms must be considered in application and the circuit must be designed to ensure that an arc-breaking time of 50 ms is not exceeded.

## ■ Characteristics

Item	Open or bifurcated-contact Relays																												
Contact resistance (see note 2)	50 mΩ max.																												
Set time (see note 3)	AC: 30 ms max.; DC: 60 ms max. (minimum pulse width for AC and DC: 100 ms)																												
Reset time (see note 3)	30 ms max. (minimum pulse width for AC and DC: 100 ms)																												
Max. operating frequency	Mechanical: 1,800 operations/hr Electrical: 1,800 operations/hr (under rated load)																												
Insulation resistance (see note 4)	100 MΩ min. (at 500 VDC)																												
Dielectric strength	1,500 VAC, 50/60 Hz for 1 min between contacts of same polarity 2,000 VAC, 50/60 Hz for 1 min between contacts of different polarity, between contacts and coil, and between set and reset coils																												
Vibration resistance	Destruction: 10 to 55 to 10 Hz, 0.375 mm single amplitude (0.75 mm double amplitude) Malfunction: 10 to 35 to 10 Hz, 0.5 mm single amplitude (1.0 mm double amplitude)																												
Shock resistance	Destruction: 500 m/s <sup>2</sup> Malfunction: 50 m/s <sup>2</sup>																												
Endurance	Mechanical: 2,500,000 operations min. (at 1,800 operations/hr) Electrical: 500,000 operations min. (at 1,800 operations/hr under rated load) (see note 5)																												
Error rate (level P) (Reference value) (see note 6)	10 mA at 5 VDC																												
Ambient temperature	Operating: -10°C to 55°C (with no icing or condensation)																												
Ambient humidity	Operating: 5% to 85%

- Note:**
- The data shown above are initial values.
  - The contact resistance was measured with 1 A at 5 VDC using the voltage drop method.
  - The set or reset time was measured with the rated voltage imposed with any contact bounce ignored at an ambient temperature of 23°C.
  - The insulation resistance was measured with a 500-VDC megger applied to the same places as those used for checking the dielectric strength.
  - The electrical endurance was measured at an ambient temperature of 23°C.
  - This value was measured at a switching frequency of 60 operations per minute.

## ■ Characteristics (Conforming to Auxiliary Power Relay Specifications)

Vibration resistance	Destruction: 10 to 55 to 10 Hz, 0.375 mm single amplitude (0.75 mm double amplitude) Malfunction: 10 to 22 to 10 Hz, 0.5 mm single amplitude (1.0 mm double amplitude)
Shock resistance	Destruction: 300 m/s <sup>2</sup> Malfunction: 30 m/s <sup>2</sup>
Endurance	Mechanical: 2,500,000 operations min. (at 1,800 operations/hr) Electrical: 500,000 operations min. (at 1,800 operations/hr under rated load) (see note 2)
Error rate (level P) (Reference value) (see note 3)	10 mA at 5 VDC
Ambient temperature	Operating: -10°C to 40°C (with no icing or condensation)
Ambient humidity	Operating: 5% to 85%
Weight	MM4KP-JD: Approx. 570 g MM4XKP-JD: Approx. 580 g

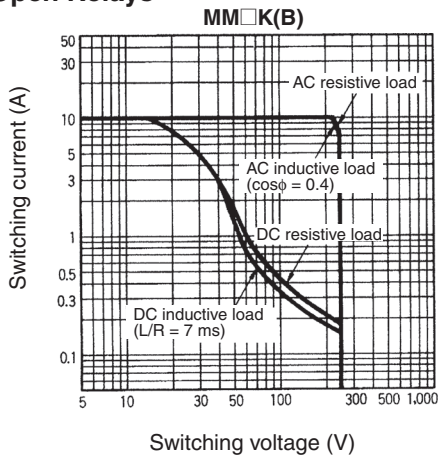

- Note:**
- The data shown above are initial values.
  - The electrical endurance was measured at an ambient temperature of 23°C.
  - This value was measured at a switching frequency of 60 operations per minute.

## ■ Cased Relays with Plug-in Terminal

### MM2(X)KP

MM2KP

**Note:** It is recommended that 55 mm min. is allowed for this side because the MM2XKP has a curved protective plate on the side.

### Terminal Arrangement/ Internal Connections (Bottom View)

#### Standard Relays MM2KP

#### DC-switching Relays MM2XKP

**Note:** Connect the common (C) to positive (+).  
Make sure that all common connections are the same in polarity. The markings of the common connections on the casing all show "+" but the polarity of the common connections can be either all negative or all positive.

### MM3(X)KP MM4(X)KP

MM4KP

**Note:** It is recommended that 73 mm min. is allowed for this side because the MM3XKP and MM4XKP have a curved protective plate on the side.

### Terminal Arrangement/ Internal Connections (Bottom View)

#### Standard Relays

##### MM3KP

##### MM4KP

#### DC-switching Relays

##### MM3XKP

##### MM4XKP

**Note:** Connect the common (C) to positive (+).  
Make sure that all common connections are the same in polarity. The markings of the common connections all show "+" but the polarity of the common connections can be either all negative or all positive.

## Cases on Models for Switching DC Loads

As shown at the right, there are three holes with a 10-mm diameter in the case.

Be sure the polarity is correct when connecting Exposed Models.

This example is for the MN2XK.  
This also applies to models with 3 or 4 poles.

MM4KP-JD

Terminal Arrangement/  
Internal Connections  
(Bottom View)

**Note:** The MM4KP-JD is DPDT and DPST-NO.

MM4XKP-JD

**Note:** The MM4XKP-JD is DPDT and DPST-NO. Make sure that all common connections are the same in polarity. The markings of the common connections on the casing all show "+" but the polarity of the common connections can be either all negative or all positive.

### ■ Height with Socket

#### DIN Track/Front-connecting Socket

#### Back-connecting Socket

**Note:** □PFA can be both track-mounted and screw-mounted.

# Safety Precautions

Refer to *Safety Precautions for All Relays*.

## ■ Mounting

Make sure that the Relay is free from iron powder or iron core, otherwise the iron dust may adhere to the Relay. As a result the movable contact may not operate properly.

An arc may be generated between the contacts in switching operation. Be sure to keep combustible objects away from the Relay. If the arc will have a bad effect around the Relay, the use of a model with a casing is recommended.

A model switching DC load incorporates an insulation base with a small built-in permanent magnet. Be sure to keep magnets or ferrous objects away from the permanent magnet, otherwise the capacity of the maximum switching current may drop.

The PL Back-connecting Socket must be flush-mounted from the surface of the panel.

If two or more Relays are mounted together, make sure that a minimum space of 20 mm is provided between adjacent Relays.

Be sure to mount the Relay so that the movable contact is in the downward direction.

## ■ Connection

- When connecting a load to the contact terminals of a model for switching DC loads ("X" models), consider the polarity of the contact terminals so that the generated arcs on the adjacent poles will not collide. (For example, if the common connections of the Relay are all positive or all negative, no arc collision will occur.)
- Use proper crimp terminals or 1.2- to 2-mm-dia. single-conductor wire to connect screw terminals.

## Screw Terminal Model

Do not bend the coil terminals, otherwise the coil wire may be disconnected. Make sure that the tightening torque applied to each terminal is 1.27 N • m and the insertion force is 49 N for 10 s.

## Solder Terminal Model

Make sure that Relay terminals are free of flux or other foreign substance before soldering the Relay terminals. Finish soldering the Relay terminals quickly, otherwise the coil wire may be broken.

## ■ Circuits

- You cannot use single contact to demagnetize the set coil as shown below.

⊗ : Latching Relay coil  
X<sub>b</sub> : NC contact of the Relay

- NC contacts can remain open for a few milliseconds when the reset coil turns ON and OFF. NO contact can remain open for a few milliseconds when the set coil turns ON and OFF while the Relay is latched. Design your circuits to allow for this.

- Do not allow voltage to be applied simultaneously to both the set and reset coil. If voltage is applied simultaneously, the Relay will be set.
- There is no reason to apply voltage to Latching Relays continuously because they will latch properly with a single pulse of sufficient width. Continuously applying voltage will only waste power.
- A model for DC loads incorporates a permanent magnetic for arc suppression. Keep floppy disks away from the Relay, otherwise the data on the floppy disk may be damaged.
- Arcing when switching DC power can cause nitric gas to be generated. The case of the MM□XKP contains holes to allow the gas to escape. This, however, makes it possible for dust and dirt to enter the case. Be sure to use the MM□XKP in a suitable environment.

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.

To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527.

## Read and Understand This Catalog

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

## Warranty and Limitations of Liability

### WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

### LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

## Application Considerations

### SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

### PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

## Disclaimers

### CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

### DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

### PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

### ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.
