Description

The UMK RELAYS are industrial interface relays used in applications where low level control signals must switch high level loads. The DPDT (Double Pole Double Throw) version allows switching of two loads with a single control signal.

With 24 V dc resistive and inductive current ratings of 10 amps, the UMK 22 RELAY is ideal for general purpose relay applications.

The UMK 22 RELAYS are offered in 5 V, 12 V, 24 V, 48 V dc and 120, 230 V ac coil ratings.
