# "KNA3-RS" safety relay (45 mm)

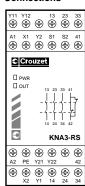

- "Emergency stop" and "mobile guard monitoring" functions
- "CE" conforming product / BG approved
- Control device with one or two channels
   Safety via redundancy and self-checking
- Integrity check on control devices
   3 "N/O" safety contacts with linked contacts 6 A / 250 ~
   1 "N/C" signalling contact
- Separate return loop
- Can be used to obtain level 4 according to NF.EN 954-1

Technical characteristics	Technical characteristics		
Power supply			
Power supply voltage	∼ 24 V 50/60 Hz		
. one. supply remage	== 24 V max. ripple 10%		
Operating range	-15% / +10% of Un for ~		
operating range	-15% / +15% of Un for ===		
On/off indication	1 power supply voltage LED		
Accuracy			
Reset time	< 25 ms		
Maximum response time on	< 50 ms		
emergency stop	< 50 ms		
Output specification			
Type	Volt-free outputs		
No. of safety circuits	3 "N/O" AgSnO2 contacts		
No. of data circuits	1 "N/C" AgSnO <sub>2</sub> contacts		
Breaking capacity	1500 VA resistive		
Max. current breaking capacity	6.82 A		
Max. voltage breaking capacity	440 V~		
Electrical life	10 <sup>5</sup> operations at 1500 VA resistive		
	5.10 <sup>5</sup> operations at 500 VA resistive		
Mechanical life	10 <sup>7</sup> operations		
	10 operations		
Operation and use			
Max. absorbed power	AC 1.6 VA / DC 2 W		
On/off indication	1 internal relay status LED		
Operating temperature	0°C to +50°C acc. to IEC 68-2-14		
Storage temperature	-20°C to +70°C acc. to IEC 68-1/2		
Internal voltage	24 V		
Dielectric strength	2.95 kV according to IEC 664-1		
Resistance to tracking	Material group III		
	<u> </u>		
EMC immunity according to EN			
Rapid transients	2 kV directly acc. to IEC 1000.4.4		
	4 kV directly for the 230 V∼ version		
	2 kV when coupled		
Radiated electromagnetic field	30 V/m Level X acc. to IEC 1000.4.3		
	80 MHz to 1 GHz / 900 MHz		
	(ENV 50140/204)		
Electrostatic discharges	15 kV in the air acc. to IEC 1000.4.2		
Shock waves	Level 3 according to IEC 1000.4.5		
J			
	Common mode 4 kV for $230 \text{ V}_{\odot}$ .		
	Common mode 4 kV for 230 V~

#### Connections

# Key

A1-A2

Y11-Y12 and Y21-Y22

: Power supply : Redundant inputs with differentiated voltage for

control devices : Start / validation

Y1-Y2 S1-S2 : Short-circuit protection on start / validation input

X1-X2 : Return loop

13-14/23-24/33-34

: "N/O" safety contacts : "N/C" signalling contacts 41-42

To order, specify: Part number Standard products Example: KNA3-RS safety relay: 85 100 434

## Control devices:

Depending on the degree of safety required, KNA3-RS can receive the following components as inputs:

- emergency stop pushbuttons with two contacts (Y11-Y12 and Y21-Y22)
- position sensors (limit switches) with one or two contacts (Y11-Y12 and Y21-Y22)
- pushbutton for start or validation (Y1-Y2)

A positive break operation device must be used if a single contact is used.

To increase the degree of safety, one "N/C" auxiliary contact per power contactor is wired on terminals X1-X2 to ensure self-checking in this part of the installation.

## Control devices:

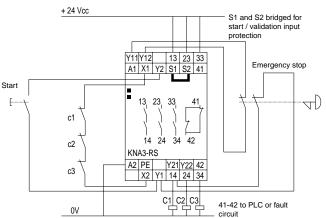

The KNA3-RS has three "N/O" safety contacts (13-14/23-24/33-34) and one "N/C" signalling contact (41-42). One or more control devices may be wired up to the breaking capacity of the safety contacts: 1500 VA. However, to limit internal heating in the KNA3-RS, it is advisable not to exceed 10 A thermal for all three contacts. The signalling contact cannot be used as a safety contact.

The signalling contact can be wired on a PLC input or integrated into a fault signalling system.

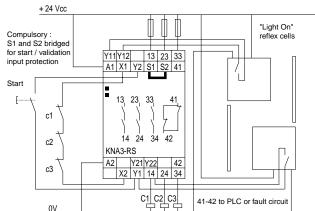

## Extending the number of contacts:

The number of contacts of the KNA3-RS can be extended and the breaking capacity thus increased. To do this, use the KZE3-XS (see page 11/20).

## **Examples of use**

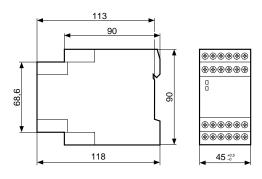

KNA3-RS fitted with emergency stop with two channels + wired return loop. LEVEL 4 SAFETY

KNA3-RS fitted with two cells LEVEL 2 SAFETY

## **Dimensions**

## Mounting - Removing see page 11/7
