NOTES

On two coil latching relays

1. To maintain insulation between coils, terminals 6 and 7 should be connected to provide common return.

- 2. Two coil latching relays are for intermittent operation only. Power should be applied to coils for no more than two minutes; continuous operation may burn out the coils.
- 3. Position of MBB contacts 2M (2 Form D 4 Form C): 1-21-22, 10-11-12 4M (4 Form D 2 Form C): 1-21-22, 2-20-18, 9-13-15, 10-11-12

For Cautions for Use, see Relay Technical Information

^{**} Two coil latching series are for intermittent operation only. Power should be applied to coil continuously for no more than two minutes.
