Clafe 7808

LBB120 Dual Single-Pole, Normally Closed OptoMOS ${ }^{\circledR}$ Relay

| Parameter | Ratings | Units |
| :--- | :---: | :---: |
| Blocking Voltage | 250 | $\mathrm{~V}_{\mathrm{P}}$ |
| Load Current | 170 | mA |
| Max $\mathrm{R}_{\text {ON }}$ | 20 | $\Omega$ |

## Features

- $3750 \mathrm{~V}_{\text {rms }}$ Input/Output Isolation
- Small 8-Pin Package
- Low Drive Power Requirements (TTL/CMOS Compatible)
- High Reliability
- Arc-Free With No Snubbing Circuits
- FCC Compatible
- VDE Compatible
- No EMI/RFI Generation
- Machine Insertable, Wave Solderable
- Surface Mount, Tape \& Reel Version Available

## Applications

- Telecommunications
- Telecom Switching
- Tip/Ring Circuits
- Modem Switching (Laptop, Notebook, Pocket Size)
- Hook Switch
- Dial Pulsing
- Ground Start
- Ringing Injection
- Instrumentation
- Multiplexers
- Data Acquisition
- Electronic Switching
- I/O Subsystems
- Meters (Watt-Hour, Water, Gas)
- Medical Equipment-Patient/Equipment Isolation
- Security
- Aerospace
- Industrial Controls

## Description

LBB120 is a dual 250V, 170mA, $20 \Omega$ normally closed (1-Form-B) relay that features low on-resistance combined with enhanced peak load current handling capability.

The efficient MOSFET switches and photovoltaic die use Clare's patented OptoMOS architecture to provide $3750 \mathrm{~V}_{\text {rms }}$ of input to output isolation. The optically coupled outputs are controlled by highly efficient GaAIAs infrared LEDs.

Dual single-pole OptoMOS relays provide a more compact design solution than discrete single-pole relays in a variety of applications by incorporating both relays in a single 8-pin package.

## Approvals

- UL Recognized Component: File E76270
- CSA Certified Component: Certificate 1175739
- EN/IEC 60950-1 Certified Component:

TUV Certificate B 090749410004

## Ordering Information

| Part \# | Description |
| :--- | :--- |
| LBB120 | 8-Pin DIP (50/Tube) |
| LBB120S | 8-Pin Surface Mount (50/Tube) |
| LBB120STR | 8-Pin Surface Mount (1000/Reel) |

## Pin Configuration

Switching Characteristics of Normally Closed Devices

## Manufacturing Information

## Moisture Sensitivity

All plastic encapsulated semiconductor packages are susceptible to moisture ingression. Clare classified all of its plastic encapsulated devices for moisture sensitivity according to the latest version of the joint industry standard, IPC/JEDEC J-STD-020, in force at the time of product evaluation. We test all of our products to the maximum conditions set forth in the standard, and guarantee proper operation of our devices when handled according to the limitations and information in that standard as well as to any limitations set forth in the information or standards referenced below.

Failure to adhere to the warnings or limitations as established by the listed specifications could result in reduced product performance, reduction of operable life, and/or reduction of overall reliability.

This product carries a Moisture Sensitivity Level (MSL) rating as shown below, and should be handled according to the requirements of the latest version of the joint industry standard IPC/JEDEC J-STD-033.

| Device | Moisture Sensitivity Level (MSL) Rating |
| :---: | :---: |
| LBB120 / LBB120S | MSL 1 |

## ESD Sensitivity

This product is ESD Sensitive, and should be handled according to the industry standard JESD-625.

## Reflow Profile

This product has a maximum body temperature and time rating as shown below. All other guidelines of J-STD-020 must be observed.

| Device | Maximum Temperature x Time |
| :---: | :---: |
| LBB120 / LBB120S | $250^{\circ} \mathrm{C}$ for 30 seconds |

## Board Wash

Clare recommends the use of no-clean flux formulations. However, board washing to remove flux residue is acceptable. Since Clare employs the use of silicone coating as an optical waveguide in many of its optically isolated products, the use of a short drying bake could be necessary if a wash is used after solder reflow processes. Chlorine- or Fluorine-based solvents or fluxes should not be used. Cleaning methods that employ ultrasonic energy should not be used.

## MECHANICAL DIMENSIONS

## LBB120

## PCB Hole Pattern

$\frac{\text { Dimensions }}{\mathrm{mm}}$

## LBB120S

$\frac{\text { Dimensions }}{m m}$

LBB120

## LBB120S Tape \& Reel

1. Dimensions carry tolerances of EIA Standard 481-2
2. Tape complies with all "Notes" for constant dimensions listed on page 5 of EIA-481-2

[^0]:    If both poles operate simultaneously, then the load current must be derated so as not to exceed the package power dissipation value.
    ${ }^{2}$ Measurement taken within 1 second of on-time.
