

SUPERPRO[®]/3000U

USB Interfaced Ultra-high Speed Stand-alone Universal Device Programmer

- ◆ Programs and Verify 32Mb Flash Memories Within 18 Sec.
- ◆ Up to 100 Pins Universal Pin-drivers
- ◆ Supports 11,000+ Devices including 1.5V devices
- ◆ High Programming Quality
- ◆ PC Hosted (USB), Stand-alone and Terminal Three Modes in One Unit
- ◆ Powerful and Intelligent software

SUPERPRO[®] /3000U

USB Interfaced Multi-application High-speed Universal Device Programmer

FEATURES

- ◆ Programs high-density Flash memory devices at near theoretical minimum programming times (Programs and Verifies Intel 28F320W18, 32Mb, in 18 Sec.)
- ◆ Universal pindrivers up to 100 pins
 - ◆ Standard universal 48 pindrivers support devices down to 1.5 volts.
 - ◆ 100 pindriver expander module (option), PEP3000, allows for programming of devices with up to 100 pins.
 - ◆ Universal pindriver architecture up to 100 pins makes it easy to develop device algorithms and to locate socket adapters.
- ◆ Advanced hardware features
 - ◆ Advanced hardware design minimizes ground bounce noise enabling programming of low voltage, down to 1.5 volts, devices reliably.
 - ◆ Only IC manufacturer approved programming algorithms are used for high reliability.
 - ◆ $\pm 5\%$ and $\pm 10\%$ Vcc Verification enhances programming reliability.
- ◆ Supports 11000+ devices from 100+ IC manufacturers including MEMORY, MCU, and PLD.
 - ◆ Free software updates via Internet. New device updates released monthly.
- ◆ Designed for multi-applications, three modes of operation are supported.
 - ◆ Standard PC hosted operation for R&D and Engineering.
 - ◆ Stand-alone operation for manufacturing or service. Built-in keyboard and LCD display provides for local operation.
 - ◆ Terminal mode to operate via an external instrument such as IC handler, terminal, or controller.
- ◆ Pin continuity and wrong chip insertion check prevent chips from accidental damage.
- ◆ Over-current and over-voltage protection for safety of the chip and programmer hardware.
- ◆ WINDOWS 98/ME/NT/2000/XP compatibility
- ◆ New user-friendly and powerful software with many new functions.
 - ◆ Project function simplifies processes such as device selection, file loading, device configuration setting, program option, and batch file setting into one touch step.
 - ◆ History of device selection and file loading simplifies user operation.
 - ◆ Batch command combines device operations like program, verify, security into a single command at any sequence.
 - ◆ Auto Start Batch command begins to program a chip automatically as soon as the chip is inserted.
 - ◆ Serial numbers can be generated and programmed onto a chip.
- ◆ Clustering of programmers provides for flexible and easy way for volume production programming. Several units work together in stand-alone mode to provide an environment for volume programming. Advantages over traditional gang programming are:
 - ◆ Flexible and expandable Start with one unit and add more units as the need arises.
 - ◆ Less downtime in case of a failure of a unit, other units continue to operate
 - ◆ Concurrent programming Each chip begins to program as soon as a chip is inserted into a socket.
 - ◆ 11,000 devices supported Device updates are quick and easy.

SPECIFICATIONS

Devices Supported:

EPROM, Paged EPROM, Parallel and Serial EEPROM, FPGA Configuration Serial PROM, FLASH Memory (NOR and NAND, BPROM, NOVRAM, SPLD, CPLD, EPLD, Firmware HUB, Microcontroller, MCU, Standard Logic.

Socket Adapter Supported: C Interface:

DIP, SDIP, PLOC, JLCC, SOIC, QFP, TQFP, PQFP, VQFP, TSOP, TSOPII, SOP, P SOP, TSSOP, SON, EBGA, FBGA, VFBGA, μ BGA, CSP, SCSP etc.

◆ PC Interface: USB

◆ Stand-alone mode operation Storage Media: Compact FLASH Card(option)

◆ Items included: Main programming unit, DIP48 pin socket Module, AC Power adapter, CD-ROM, User's Guide, USB Cable

◆ Optional Accessories: PEP3000 Pin-driver Expansion Pack, Socket Adapters, Compact Flash Card
