## **NTSC Pattern Generators**

1211E

## Model 1249B **NTSC Generator with RGB**

The 1249B is ideal for comprehensive testing, servicing and adjustment of video and television equipment, television receivers, video tape recorders, video monitors, closed circuit television systems and components, and master antenna systems and components.

- NTSC color bar pattern, ±5 and ±5 IEEE units
- CH 3, CH 4, and IF outputs crystal controlled
- Calibrated IVp-p or variable composite video output
- RGB outputs on BNC or 9-pin **D** connector
- Composite sync, vertical sync, and horizontal sync outputs
- Interlaced or progressive scan
- 30 Hz signal is provided for isolation of servo problems in VCR's

### Model 1211E

#### **Portable NTSC Pattern** Generator with S-Video, Composite Video and **RF** outputs

This handheld NTSC Pattern Generator is powered by a 9 volt battery or AC adapter providing NTSC color bars, crosshatch, dot, staircase, circle, center cross, windows, and a full range of color raster patterns. The outputs available are composite video via RCA connector, a RF output BNC connector, or an S-Video mini-DIN output. Signals can be produced as an interlaced or progressive scanning mode.

- S-Video, composite video, **RF** output
- Interlace or progressive scanning system
- 9VDC battery (included)
- AC adapter available

One Year Warranty
