

Remote Current Indicators

The CR Magnetics **Remote Electrical Current Indicators** provides an effective method for remote monitoring of electrical current. The remote current sensing transformer is installed around the current-carrying wire and is connected directly to the LED panel indicator. When the current exceeds the turn-on point of the sensing transformer, the LED illuminates to indicate the presence of current. Two sizes of remote current sensing transformers are available for use with either one of two types of LED indicators. The panel indicators are available with red, green, amber, and blue LEDs.

PH Series

PH-25 Snap In

PH-31 Splash Proof

Model 19

Model 18 (w/ Bracket)

Applications

- Monitor Status of Heater Elements
- Observe Remote Loads
- Indicate Phase Loss
- Monitor Motor Operation

Features

- Self Powered
- Red, Green, Amber, and Blue Indicators
- Panel Mounting Bracket available

Specifications

- 100 AAC Max, 600 VAC Max rating
- 50 - 1Khz Bandwidth
- -10C - 85C Operating Temperature
- Mounting Bracket for Model 18 Current Transformer
