237 B RAM		High-Battery Voltage Detection		
Port 0 Port 1 8 I/O 8 I/O		Port 2 8 I/O	Port 3 8 I/O	

## **Features**

Key features of Zilog's ZLP32300 OTP MCU include:

- 2.0–3.6 V operation
- Low-power consumption—6 mW (typical)
- Three standby modes:
  - STOP—2  $\mu$ A (typical)
  - HALT—0.8 mA (typical)
  - Low-voltage reset
- Special architecture to automate generation and reception of complex pulses or signals:
  - One programmable 8-bit counter/timer with two capture registers and two load registers

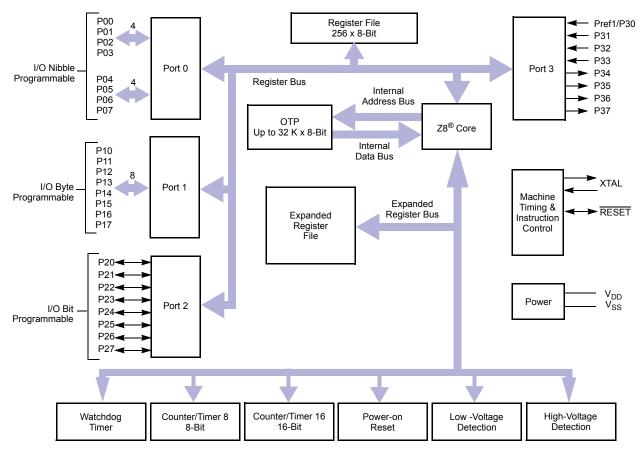

- One programmable 16-bit counter/timer with one capture register and two reload registers
- Programmable input glitch filter for pulse reception
- Six priority interrupts:
  - Three external
  - Two assigned to counter/timers
  - One low-voltage detection interrupt
- Low-voltage and high-voltage detection flags
- Programmable Watchdog Timer (WDT)
- Power-on reset (POR) circuits
- Two independent comparators with programmable interrupt polarity
- Programmable EPROM options:
  - Port 0: 0–3 pull-up transistors
  - Port 0: 4–7 pull-up transistors
  - Port 1: 0–3 pull-up transistors
  - Port 1: 4–7 pull-up transistors
  - Port 2: 0–7 pull-up transistors
  - EPROM protection
  - WDT enabled at POR

### **General Description**

The ZLP32300 MCU is an OTP-based member of the Crimzon MCU family of infrared microcontrollers. With 237 B of general-purpose RAM and up to 32 KB of OTP, Zilog's CMOS microcontrollers offer fast executing, efficient use of memory, sophisticated interrupts, input/output bit manipulation capabilities, automated pulse generation/reception, and internal pull-up transistors. Compatible with ZLR16300 and ZLR32300 mask ROM families.

### **Block Diagram**

Figure 1 displays the ZLP32300 OTP MCU functional block diagram.

Note: Refer to the specific package for available pins.

### **Ordering Information**

You can order ZLP32300 OTP MCU products from Zilog<sup>®</sup>, using the part numbers provided in the table below. For more information on ordering, please consult your local Zilog sales office. The Zilog website (<u>www.zilog.com</u>) lists all regional offices, as well as additional ZLP32300 OTP MCU Series product information.

Part Number	Description		Part Number	Description	
ZLP32300H4832	48-pin SSOP	32 K OTP	ZLP32300H4808	48-pin SSOP	8 K OTP
ZLP32300P4032	40-pin PDIP	32 K OTP	ZLP32300P4008	40-pin PDIP	8 K OTP
ZLP32300H2832	28-pin SSOP	32 K OTP	ZLP32300H2808	28-pin SSOP	8 K OTP

#### LIFE SUPPORT POLICY

ZILOG'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS PRIOR WRITTEN APPROVAL OF THE PRESIDENT AND GENERAL COUNSEL OF ZILOG CORPORATION.

#### As used herein

Life support devices or systems are devices which (a) are intended for surgical implant into the body, or (b) support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in a significant injury to the user. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system or to affect its safety or effectiveness.
