8-bit Microcontrollers

MC908QC16/8

Target Applications

> Various applications including:

- Mirrors
- Climate control
- Wiper control
- Lighting
- Window lift
- Sunroof
- - Home and industrial
- Cost-Effective LIN Family

Features **Renefits** Second-Generation Flash or Cost-Effective ROM Memory Options > Embedded, fully automotive Flash > Qualified for high temperatures, shock, > Range of memory from 8 KB to 16 KB vibrations and humidity as required by > 10K write/erase cycles at -40°C to +125°C the automotive industry > Cost-reduction path for high-volume stable programs > Ultrafast programming: 64 bytes in 2 ms > Reduced production programming costs through ultrafast programming at operating voltage > Flash block protection > Helps protect code from unauthorized reading and to guard against unintentional writing/erasing of user-programmable segments of code > Flash reprogrammable in circuit > Allows real-time Flash updates Internal Clock Oscillator > 1 MHz, 2 MHz and 3.2 MHz nominal > Eliminates the cost of all external bus frequency clock components > Fully trimmable internal oscillator > Helps to reduce board space > Less than 0.4 percent oscillator accuracy > Eliminates or reduces EMI generated from within a LIN frame external clocks > Allows option of external RC and external crystal Enhanced SCI-LIN SCI Controller > Programmable 8-bit or 9-bit > Full-duplex operation allows simultaneous transmission and reception of data character length > ESCI arbiter allows measurement of LIN > Programmable baud rates synchronization data without separate > Separately enabled transmitter and receiver timer hardware > Interrupt-driven operation with eight > Finely adjustable baud rate prescalers allow interrupt flags extremely precise control of baud rate > Capable of communication rates up > Enhanced detection of LIN break symbols to 115 kbps, encompassing all to prevent false interrupts LIN baud rates **High-Performance CPU** > Efficient instruction set, including multiply > Object code compatible with 68HC05 and divide > Easy to learn and use architecture > 16 flexible addressing modes, including > C-optimized architecture provides stack relative with 16-bit stack pointer compact code > Fully static, low-voltage, low-power design with WAIT and STOP modes Periodic Wake-Up Module > Selectable timeout periods (40 µs to > ESCI arbiter allows measurement of LIN three minutes) synchronization data without separate

- > Exit from low-power STOP mode without external signals
- > Dedicated low-power 32 kHz internal oscillator separate from the main system clock sources
- > Accessible in all modes of operation (RUN, WAIT and STOP)
- > Full-duplex operation allows simultaneous transmission and reception of data
- timer hardware
- > Finely adjustable baud rate prescalers allow extremely precise control of baud rate
- > Enhanced detection of LIN break symbols to prevent false interrupts

Overview

Freescale Semiconductor's MC908QC family of microcontrollers (MCUs) is positioned to support HC08 core small-package 8-bit microcontrollers and the low-end LIN market. QC devices are low voltage with on-chip in-circuit Flash memory programmable down to 1.8 volts. The functionality is completed with strong analog capabilities, a complete set of serial modules and robust memory options. These products are fully LIN 2.0 and J2602 compliant. They are intended to be used as LIN slaves where the application requires cost-effective hardware solutions. A variety of small packages (16-, 20and 28-pin), together with the optimized peripheral sets and the powerful HC08 CPU, make this an ideal low-end controller.

HC08 CPU	8 KB/16 KB
Internal Clock Oscillator	Up to 512 KB RAM
1 x 2-ch., 16-bit Timer	Up to 10-ch., 10-bit ADC
1 x 4-ch., 16-bit Timer	Up to 24 GPIO
Periodic Wake-Up Module	ESCI
Computer Operating Properly	SPI
Wake-Ups	
LVI	
KBI	
POR	

Cost-Effective Development Tools

For more information on development tools, please refer to the Freescale Development Tool Selector Guide (SG1011).

DEMO9S08QC16 \$75*	Cost-effective demonstration board with potentiometer, LEDs, serial port and built-in USB-MON08 cable for debugging and programming	
FSICEKITQC16 \$1,695*	Complete FSICE high-performance emulator kit; includes emulator module, cables, head adapters and programming adapters	
EML08QCBLTYE \$495*	Emulation module for FSICE system	
M68CYCLONEPRO \$499*	HC08/HCS08/HC12/HCS12 stand-alone Flash programmer or in-circuit emulator, debugger and Flash programmer; USB, serial or Etherne interface options	
USBMULTILINK08 \$99*	Universal HC08 in-circuit debugger and Flash programmer; USB PC interface	
PAS08W1628T28 <i>\$14</i> 9*	Programming adapter for MON08 cables and single MCU: 7.5 mm SOIC packages up to 28 pins, 5.3 mm SOIC packages up to 16 pins and TSSOF packages up to 28 pins	
PAS08P40B3256 \$99*	Programming adapter for MON08 cables and single MCU: DIP packages up to 40 pins and SDIP packages	
CWX-H08-SE Free	CodeWarrior [™] Special Edition for HC(S)08 MCUs; includes integrated development environment (IDE), linker, debugger, unlimited assembler, Processor Expert [™] auto-code generator, full-chip simulation and 16 KB C compiler	

*Manufacturer Suggested Resale Price

Application Notes: A Selection of More Than 300 Available				
AN2767	LIN 2.0 Connectitivity on Freescale 8/16-bit Using Volcano LTP			
AN2575	MC68HC908EY16 ESCI LIN Drivers			
AN2884	LIN 2.0 Door Lock Slave			
AN2885	LIN 2.0 Mirror Slave Unit			
AN2573	LINkits LIN Evaluation Boards			
AN2560	MC68HC908EY16 IR Receiver for Remote Control of LIN Robot			
AN2470	MC68HC908EY16 Controlled Robot Using the LIN Bus			
AN2343	HC908EY16 LIN Monitor			
AN2264	LIN Node Temperature Display			
AN2205	Car Door Keypad Using LIN			
AN2295	Developer's Serial Bootloader for M68HC08 and HCS08 MCUs			
AN2312	MC68HC908QY4 Internal Oscillator Usage Notes			
AN2317	Low-Cost Programming and Debugging Options for M68HC08 MCUs			
AN2438	ADC Definitions and Specifications			

Data Sheets MC908QC16

Device and Package Options	
----------------------------	--

Part Number	Package	Temp. Range
MC908QC16CDRE	28 TSSOP	-40°C to +85°C
MC908QC16CDSE	20 TSSOP	-40°C to +85°C
MC908QC16CDTE	16 TSSOP	-40°C to +85°C
MC908QC16CDXE	16 SOIC	-40°C to +85°C
MC908QC16CDYE	20 SOIC	-40°C to +85°C
MC908QC16CDZE	28 SOIC	-40°C to +85°C
MC908QC16VDRE	28 TSSOP	-40°C to +105°C
MC908QC16VDSE	20 TSSOP	-40°C to +105°C
MC908QC16MDRE	28 TSSOP	-40°C to +125°C
MC908QC16MDSE	20 TSSOP	-40°C to +125°C
MC908QC8CDRE	28 TSSOP	-40°C to +85°C
MC908QC8CDSE	20 TSSOP	-40°C to +85°C
MC908QC8CDTE	16 TSSOP	-40°C to +85°C
MC908QC8CDXE	16 SOIC	-40°C to +85°C
MC908QC8CDYE	20 SOIC	-40°C to +85°C
MC908QC8CDZE	28 SOIC	-40°C to +85°C
MC908QC8VDRE	28 TSSOP	-40°C to +105°C
MC908QC8VDSE	20 TSSOP	-40°C to +105°C
MC908QC8MDRE	28 TSSOP	-40°C to +125°C
MC908QC8MDSE	20 TSSOP	-40°C to +125°C
