

## Power Resistor Thick Film Technology

LTO series are the extension of RTO types. We used the direct ceramic mounting design (no metal tab) of our RCH power resistors applied to semiconductor packages.

### FEATURE

- 100 W at 25 °C case temperature heatsink mounted
- Direct mounting ceramic on heatsink
- Broad resistance range: 0.015  $\Omega$  to 1 M $\Omega$
- Non inductive
- TO-247 package: Compact and easy to mount
- Compliant to RoHS directive 2002/95/EC

### DIMENSIONS in millimeters

#### Note

- Tolerance unless otherwise specified:  $\pm 0.3$  mm

### MECHANICAL SPECIFICATIONS

Mechanical Protection	Molded
Resistive Element	Thick film
Substrate	Alumina
Connections	Tinned copper
Weight	3.5 g max.
Mounting Torque	1 Nm

### DIMENSIONS

Standard Package	TO247 package
------------------	---------------

### ENVIRONMENTAL SPECIFICATIONS

Temperature Range	- 55 °C to + 175 °C
Climatic Category	55/175/56
Flammability	IEC 60695-11-5 2 applications 30 s separated by 60 s

### ELECTRICAL SPECIFICATIONS

Resistance Range	0.015 $\Omega$ to 1 M $\Omega$
Tolerances (Standard)	$\pm 1\%$ to $\pm 10\%$
Dissipation and Associated	Onto a heatsink
Power Rating and Thermal Resistance of the Component	100 W at + 25 °C (case temp.) $R_{TH(j-o)}$ : 1.5 °C/W Free air: 3.5 W at + 25 °C
Temperature Coefficient Standard	See Performance table $\pm 150$ ppm/°C
Limiting Element Voltage $U_L$	375 V
Dielectric Strength MIL STD 202	1500 V <sub>RMS</sub> - 1 min 10 mA max.
Insulation Resistance	$\geq 10^4$ M $\Omega$
Inductance	$\leq 0.1$ $\mu$ H
Critical Resistance	1.41 k $\Omega$

PERFORMANCE		
TESTS	CONDITIONS	REQUIREMENTS
Momentary Overload	EN 60115-1 1.5 $P_T/5$ s $U_S < 1.5 U_L$	$\pm (0.5 \% + 0.005 \Omega)$
Rapid Temperature Change	EN 60115-1 IEC 60068-2-14 Test Na 5 cycles - 55 °C to + 175 °C	$\pm (0.5 \% + 0.005 \Omega)$
Load Life	EN 60115-1 1000 h $P_T$ at + 25 °C	$\pm (1 \% + 0.005 \Omega)$
Humidity (Steady State)	MIL STD 202 Method 103 B Cond. D	$\pm (0.5 \% + 0.005 \Omega)$
Vibration	MIL STD 202 Method 204 Cond. D	$\pm (0.2 \% + 0.005 \Omega)$
Terminal Strength	MIL STD 202 Method 211 Cond. A1	$\pm (0.2 \% + 0.005 \Omega)$
Shock	100G, MIL STD 202 Method 213 Cond. I	$\pm (0.5 \% + 0.005 \Omega)$

SPECIAL FEATURES				
Resistance Values	$\geq 0.010$	$\geq 0.015$	$\geq 0.1$	$\geq 0.5$
Tolerances	$\pm 1 \%$ at $\pm 10 \%$			
Typical Temperature Coefficient (- 55 ° to + 175 °C)	$\pm 900$ ppm/°C	$\pm 700$ ppm/°C	$\pm 250$ ppm/°C	$\pm 150$ ppm/°C

## CHOICE OF THE HEATSINK

The user must choose according to the working conditions of the component (power, room temperature). Maximum working temperature must not exceed 175 °C. The dissipated power is simply calculated by the following ratio:

$$P = \frac{\Delta T}{[R_{TH(j-c)} + R_{TH(c-a)}]} \quad (1)$$

- P: Expressed in W  
 $\Delta T$ : Difference between maximum working temperature and room temperature  
 $R_{TH(j-c)}$ : Thermal resistance value measured between resistive layer and outer side of the resistor. It is the thermal resistance of the component.  
 $R_{TH(c-a)}$ : Thermal resistance value measured between outer side of the resistor and room temperature. It is the thermal resistance of the heatsink itself (type, shape) and the quality of the fastening device, and the thermal resistance of the thermal compound.

### Example:

$R_{TH(c-a)}$  for LTO 100 power rating 10 W at ambient temperature + 25 °C

Thermal resistance  $R_{TH(j-c)}$ : 1.5 °C/W

Considering equation (1) we have:

$$\Delta T = 175 \text{ °C} - 25 \text{ °C} = 150 \text{ °C}$$

$$R_{TH(j-c)} + R_{TH(c-a)} = \frac{\Delta T}{P} = \frac{150}{10} = 15 \text{ °C/W}$$

$$R_{TH(c-a)} = 15 \text{ °C/W} - 1.5 \text{ °C/W} = 13.5 \text{ °C/W}$$

with a thermal grease  $R_{TH(c-h)} = 1 \text{ °C/W}$ , we need a heatsink with  $R_{TH(h-a)} = 12.5 \text{ °C/W}$ .

## OVERLOADS

In any case the applied voltage must be lower than the maximum overload voltage of 560 V.

The values indicated on the graph below are applicable to resistors in air or mounted onto a heatsink.

## ENERGY CURVE

## POWER RATING

The temperature of the case should be maintained within the limits specified.

To improve the thermal conductivity, surfaces in contact should be coated with a silicone grease and the torque applied on the screw for tightening should be around 1 Nm.

## MARKING

Model, style, resistance value (in  $\Omega$ ), tolerance (in %), manufacturing date, Vishay Sfernice trademark.

## PACKAGING

Tube of 30 units

## ORDERING INFORMATION

LTO	100	F	2.7 k $\Omega$	$\pm 1\%$	xxx	TU30	e3
MODEL	STYLE	CONNECTIONS	RESISTANCE VALUE	TOLERANCE	CUSTOM DESIGN	PACKAGING	LEAD (Pb)-FREE

## Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and/or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk and agree to fully indemnify and hold Vishay and its distributors harmless from and against any and all claims, liabilities, expenses and damages arising or resulting in connection with such use or sale, including attorneys fees, even if such claim alleges that Vishay or its distributor was negligent regarding the design or manufacture of the part. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.
