### Description

The STEVAL-IHM011V1 evaluation board is a complete platform for evaluating the STMicroelectronics power module SEMITOP2<sup>®</sup> devices. Based on a cost-effective, flexible and open design, it is an evaluation platform which is compatible with the latest STMicroelectronics microcontroller-based solution. It includes the 10A, 600 V STG3P2M10N50B IGBT power module (see note 1). This evaluation board has a motor control connector (mc-connector) and hardware features for developing motor control applications. It also includes hardware protection features such as current and thermal protection.

*Note: 1 The kit has been designed and tested to work with European mains (maximum 380 V<sub>DC</sub>)*
