

ALM-31222

1.7-2.7GHz
1-Watt High Linearity Amplifier

Data Sheet

Description

Avago Technologies' ALM-31222 is a high linearity 1 Watt PA with good OIP3 performance and exceptionally good PAE at 1dB gain compression point, achieved through the use of Avago Technologies' proprietary 0.25um GaAs Enhancement-mode pHEMT process.

All matching components are fully integrated within the module. This makes the ALM-31222 extremely easy to use. The adjustable temperature-compensated internal bias circuit allows the device to be operated at either class A or class AB operation.

The ALM-31222 is housed inside a miniature 5.0 x 6.0 x 1.1 mm³ 22-lead multiple-chips-on-board (MCOB) module package.
