Applications

3M Conductive Silver Fabric Tape AG-2300 is typically used for applications requiring excellent electrical conductivity from the application substrate through the adhesive to the conductive fabric backing. Common uses include grounding and EMI shielding in equipment, components, shielded rooms, etc.

Shielding Effectiveness

Many factors determine the shielding effectiveness of a conductive adhesive tape, including type and thickness of the conductive layers, adhesive strength, degree of contact, smoothness of application surface, frequency, etc. For 3M Conductive Silver Fabric Tape AG-2300, typical shielding effectiveness is in the range of 65dB to 70dB when tested according to ASTM D4935 standard.
