### NovaSensor Surface Mount Pressure Sensor

NPP-301 Series is a NovaSensor product. NovaSensor has joined other GE high-technology sensing businesses under a new name— GE Industrial, Sensing.

## NPP-301 Series Specifications

#### Description

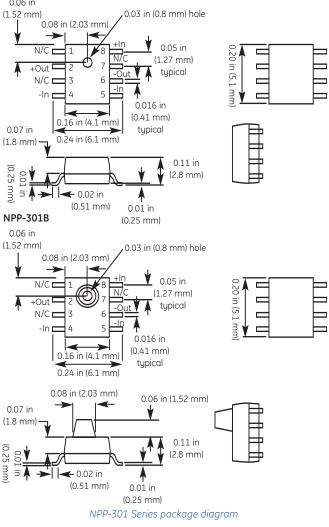

The NPP-301 Series features silicon pressure sensors in surface mount packages. An ultra-small Silicon Fusion Bonded (SFB), ultra-high stability SenStable<sup>®</sup> piezoresistive chip from NovaSensor is placed in a plastic package that exploits high volume, leadframe package technology to bring forth a low-cost sensor alternative to the OEM user.

The NPP-301 Series produces a voltage output that is linearly proportional to the input pressure. The user can provide NPP Series products with signal conditioning circuitry to amplify the output signal or to maximize OEM value added. The NPP-301 Series is compatible with most non-corrosive gases and dry air.
