REPLACEMENT SOLDERING TIPS & SOLDERING STATIONS

SOLDER/REWORK STATION

The EB9000S Soldering/Rework Station, using Curie Heat Technology, will provide years of reliable performance. With this very precise and self-regulating technology, temperature calibration is not required. Included in the EB9000S are a 13.56 MHz Power Supply, detachable soldering iron stand with sponge and brass curl, tip removal pad, and the EBM8CH176 Solder Tip cartridge.

REPLACEMENT SOLDERING TIPS PROVIDE IMPROVED POWER, PERFORMANCE AND RELIABILITY

- Increased plating results in longer service life and cost savings
- Better connectivity through the use of gold plated connectors
- Faster point to point soldering
- Stable tip temperature
