

Don't allow visitors to bypass your ESD control program. Ground visitors with disposable foot grounders. By grounding people in the work area, the opportunity for static related damage is reduced.

3M™ Disposable Heel Grounder (Economy Performance)

Disposable Foot Grounder

This cost effective disposable foot grounder provides static protection and is ideal for one-time use applications. Excellent for short term use by visitors in electronics manufacturing or for field service and remote electronic equipment installations.

This heel grounder provides a conductive path from the person to the walking surface. Adhesive holds the grounder to shoe sole. No metal clips or glue are attached to the upper part of the shoe, avoiding wear. Yellow color makes heel grounder verification simple. Grounders are packaged 100 per bag with instructions.

Features

- Low cost static control for visitors and temporary situations.
- Conductive connection from person to walking surface.
- Simple application encourages use.
- No glue or metal to mark the upper part of the shoe.
- Yellow color for high visibility.

Specifications:

Resistance: Less than 1 megohm
 Color: Yellow and black
 Packaging: 100 grounder per bag

Part Number:

5402 Disposable Foot Grounder

Application Notes:

- Wear grounders on both shoes to maintain ground contact when walking.
- Excessive dirt on the shoe sole may reduce the adhesion of the grounder to the shoe.
- These grounders do not contain a 1 meg resistance. Exercise appropriate precautions near exposed voltage.

Front Back

Instructions

1. Remove cover to expose tape.

2. Press tape to heel of shoe. (Cover at least half of the heel)

3. Wrap grounder around heel and place inside shoe.

4. Make certain the grounder stays under the foot when the shoe is on. Repeat for other shoe.
