Revised July 26, 2010

H-38-11 Hardware Change

In line with our commitment to provide our customers with good value, Bourns® Sensors and Controls Product Line is making a change to the H-38-11 metric hex nut used for mounting many of our models with a 9 mm diameter bushing.

The existing black powder-coated brass hex nut will no longer be powder-coated. The new hex nut will be provided without powder-coating or plating. For your reference, photos of the old and new hex nuts are provided below:

OLD

NEW

Other metric nut part numbers affected by this change include H-38-8, H-38-9, H-38-14 and H-38-17. The new hex nut will be shipping with orders the week of August 8, 2010.
