Control Switches and Signaling Devices, 22.5mm Plastic Series

This range of 22.5mm plastic series pushbuttons, selector switches, illuminated switches and pilot lights have been designed to provide the following features:

- Economy of space
- Self wiping contacts
- Safe in operation
- Simple to mount (only need a screw driver)
- Mounting method is unaffected by excessive vibration
- Electric shock protection (grounded unit)
- Aesthetically pleasing
- Heavy-duty construction
- Shrouded terminals
- Very good flame resistance
- Use of LEDs for long life

Actuators

The circular actuators have black plastic bezels and are functionally interchangeable on the different contact elements.

Contact elements

The contact elements are double break and have self-wiping contacts. The elements are interchangeable and can be stacked without additional hardware. 1 to 6 elements (NO or NC) can be used for non-illuminated actuators, whereas, 1 to 4 elements (NO or NC) can be used for illuminated actuators. Gold NO or NC contact elements for low voltage, low current, < 25mA, switching applications are available.

Illuminated pushbuttons and pilot lights

Pilot lights and pushbutton switches are suitable for direct connection through a series resistor, series resistor and diode, using bayonet cap filament bulb type BA9s as follows:

- Supply voltage for direct connection without series resistor 6V - 130V
- Supply voltage through series resistor 12V - 415V
- Supply voltage through resistor and diode 230 VAC
- Bulb Filament, type BA9s with OAL max. 28mm

Pilot lights and illuminated actuators are available with integral LEDs, suitable for operating at various voltages; 6V, 12V, 24V, 30V, 48V, 63.3V, 110V, 125V, 230VAC or DC and 415VAC. Pilot lights and illuminated actuators are available with LED bulbs (bayonet cap, BA9s design with OAL max. 28mm) suitable for operating at various voltages; 24V, 110V and 230V. On request an extra short circuit protection consisting of built-in fuse in the LED modules can be provided. Pilot lights are available with built -in transformers suitable for operating at 110VAC, 230VAC input and 6V, 12V and 24V output.

Terminals

Contact elements and pilot lights are designed to have shrouded terminals with combination screws.

Mounting

The plastic series control devices 22.5mm can be mounted in any position on panels of 1 to 5 mm thickness. We recommend minimum mounting centers of 30mm x 40mm. However, the dimensions and configuration should be decided on the basis of the application. The actuators and the lens assemblies lock on the holding bracket. See assembly details.

Electrical and mechanical characteristics

- Environment
- Standards conformity: CSA - C22.2 No. 14-95, UL508, EN60947-5-1 2000
- Approvals: CSA - C22.2 No. 14-95, UL508, VDE0660
- Degree of protection: IP 65 as per IEC529, NEMA 4X, 12 as per UL50
- Ambient temperature: -25°C to +70°C
- Operating position: All positions

Contact block

- Rated insulation voltage: 500V
- Rated thermal current: 10A
- Contact operation: Self wiping, slow break NO or NC
- Make and break capacity as per IEC 947-5-(1) 1990: AC 15 - 4A, 415VAC; DC 13 - 0.5A, 110VDC
- Terminal capacity: Minimum 1 X 0.5mm², minimum 2 x 15mm², or 1 x 2.5mm²
- Terminals marking: 1-2 for NC, 3-4 for NO
- Short circuit protection: 10A cartridge fuse, HRC type, rated for resistive loading
- Mechanical life: Over one million operations
- Electrical rating (one million operating cycles at 3600 cycles per hour, load factor 0.5)

AC15	V	24	120	230	DC13	V	24	110
	A	4	3	2		A	0.5	0.2

Modules for pilot lights and illuminated switches with integral LED / LED bulb (BA9S cap)

Current consumption (applicable to all colors)

- 24VAC/DC, 110VAC and 240VAC: max. 20mA
- 110VDC: max. 15mA
- 220VDC: max. 10mA
- Service life (at nominal voltage and at ambient temperature): 100,000 hours
- Voltage limits (nominal voltage): <20% of rated voltage>
- Short circuit protection: on specific request
- Terminal capacity: min. 1 X 0.5mm², max. 2 x 1.5mm² or 1 x 2.5mm²

Control Switches and Signaling Devices, 22.5mm Plastic Series

Ordering Information

1. Actuators, illuminated actuators, contact elements, lens assemblies and pilot lights are each ordered separately. For complete assemblies, please contact the factory for specific part numbers.

2. Prefix ASP2 for all actuators indicates 22.5 plastic series

3. The type numbers of contact elements are:

NO	Actuator mounting	S1, S3
	Individual mounting	S5, S7
NC	Actuator mounting	S2, S4
	Individual mounting	S6, S8

Note: S3, S4, S7, and S8 have gold plated contact suitable for low voltage, low current applications <25mA

4. Part number examples:

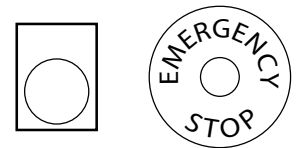

Actuator	ASP2AF3	= flush actuator, green
Pilot light	ASP2PLB4	= pilot light without series resistor, red

Accessories and spares

Legend plates

Legend plates 30 x 40 mm are supplied with the following standard text:

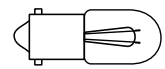

START UP OPEN AUTO SLOW RESET ON RIGHT FORWARD TRIP
STOP DOWN CLOSE HAND FAST INCH OFF LEFT REVERSE POWER ON

Replacement bulbs

Yellow	8

* Selector is available in black only

Options (see note)	Code
Booted (flush actuator only)	BT7
Extended (selector actuator only)	E

Note: Except for Selector types or a flush boot option, your order number is complete after decision 3. However, if a Selector type is required, please continue with the remaining decisions. If a flush boot is required your part number is complete after decision 4

Note:
Mounting bracket is included.
However, see tables 1 & 2 to order contact elements separately

Decision 5 is required only when a "Selector" type actuator is selected from decision 2.
