## mec

 switches

The Multimec 5E and 5G series is the new generation of the existing 3A, 3C, 3E, 3F, 4A and 4Fmultimec switches. The 5 E and 5 G series is a narrower product line, but the flexibility is more advanced. The switches will be supplied in high temperature material only to stand today's advanced soldering processes. The cap holding system is improved, by a superior snap system.

The 5E and 5G series can be supplied with LED's integrated in the switch and also as a surface mount switch. A high variety of aesthetic designed keycaps is available for the multimec switches both as solid caps, but also with excellent illumination possibilities.

The standard program will include three different actuation forces: $2,3.5$, and 6.5 N . The multimec switches are known for their crisp audible tactile feel although a quiet version is available for sensitive applications such as audio, conference and military equipment.

The switch can be used as through-hole or SMD versions, and are designed to be used in a wide variety of applications.

## Distributor:

## multimec ${ }^{\circledR}$

## Technical Data:

- through-hole or SMD / 50mA/24VDC / single pole/momentary
- 10.000.000 operations life time / IP67 sealing / actuation force: 2.0, 3.5, 6.5 N
- high temperature $-40 /+160^{\circ} \mathrm{C}$

## HOW TO ORDER
