

# 1mm Pitch FPC/FFC Connector

## FH 21 Series

### ■ Features

#### 1. LIF (Low Insertion Force) Mechanism

LIF mechanism secures mounting serviceability.

#### 2. Kink Mechanism

DIP post is treated with kinks, and prevent connector floating in the soldering process.

#### 3. Contact Structure on Both Sides

The contact structure on both sides does restrict directionality of FPC and FFC conductors.

### ■ Applications

HDD, facsimiles, printers, and crystal liquie modules, etc.

Note 1. Temperature rise included when energized

Note 2. This storage indicates a long-term storage state for the unused product before the board mounted.

The operating temperature and humidity ranges are applied to the non-energized state after the connector has been installed in the board.

Note 3. The above standards represent this series. The individual formal agreement should be based on the "Specification".
