DESCRIPTION

Using four basic types of connectors, 1-Wire RJ-11, *iButton*, Touch-and-Hold Probe, and Blue Dot Receptor, the DS1402 series of 1-Wire network cables provides connectivity for *iButtons*. The cables are designed to connect any USB, serial, or parallel port 1-Wire adapter to any *iButton*. Both, the *iButton* probe cables and the Blue Dot receptor cables can touch any *iButton*, but can only hold the F5 version *iButtons*. The DS1402-BR8+ is the only cable that connects to the DS1401 *iButton* Holder. Applications of the DS1402-series 1-Wire network cables range from software protection and access control to asset management and thermal monitoring through handheld computers.
