

The easiest to install, yet most efficient
Category Five connector ever.

THE
EZ-RJ45

The new patented EZ-RJ45™ connector simplifies installation by allowing the pairs to be inserted *through* the connector. There is no difficult to handle liner or wire bar to deal with. Inspection of the correct conductor order is done before crimping so no connector is wasted because if incorrect wiring.

The conductors are able to be pulled forward so the pairs are very close to the contacts. This method allows the integrity of the pairs to maintain Category Five, and even enhanced Category Five capabilities.

The EZ-RJ45™ can be crimped with most any standard tool, then trimmed with a cutter or small utility knife. However, the new BD45000 crimp tool crimps and trims the exposed conductors in one operation. The vertical action of the crimper makes a uniform and positive crimp.
