Value Propositions: Increased Efficiencies · Troubleshooting Flexibility

DIN-Rail Receptacles

Weidmüller's new DRAC Series of DIN-Rail AC receptacles are enclosed 15A or 20A power outlets that provide a simple and convenient power source inside a panel. These units are ideal for portable computers or test devices for in-panel troubleshooting.

- Easily snaps onto 35mm DIN-rail
- Easy to wire
- Available with ground fault current interrupt (GFCI) or standard duplex outlets
- Option for visual indication of power included with GFCI
- NEMA rated enclosure with UL94 VO flammability rating
- UL508A and cULus approved

The DRAC Series of DIN-Rail AC receptacles are a further addition to Weidmüller's existing line of simplex, duplex, and GFCI in-panel receptacles.

Features

Two mounting options:
snaps onto 35mm DIN-Rail, or panel mounted

Easy to wire

Available with options: Choice of 15A or 20A outlet
120VAC versions; both available as Duplex or GFCI versions

Only 2.9" wide

Visual power indication

UL508A and cULus approvals

Single unit module

Benefits

Allows deployment flexibility, quick installation;
and has simple terminations

Saves time on installation

Flexibility in design; four versions available with
the same footprint

Outlets easily fit in control cabinet or mount efficiently
on a DIN-Rail for maximum space savings

Easy visual trouble shooting and status notification

Allows the user to deploy the outlet in any UL panel or system

Simple installation; snap on DIN-rail and plug in
