The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. All non-RoHS products have been discontinued, or will be discontinued soon. Please check the products status on the Hirose website RoHS search at www.hirose-connectors.com, or contact your Hirose sales representative.

## **2mm Pitch Connector Directly Mounted on Board**

## **DF4** Series

### **Features**

1. Cost Saving for Header

Thanks to the insertion/extraction socket and the harness product at the both connector edges, one of two headers necessary at both edge sockets can be saved without losing the function to separate individual boards.

2. Miniature and Multiple Contacts The miniature connector has broad variations in contact number.

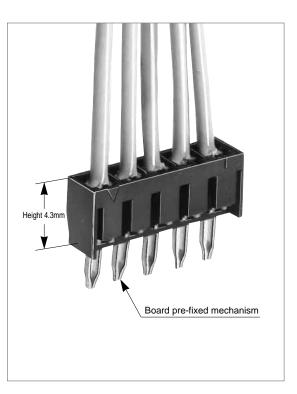

| Board mounting height :  | 4.3mm (Crimping Single row )       |
|--------------------------|------------------------------------|
| Maximum contact number : | 32 contacts (Crimping Double row ) |

3. Board Pre-fixed Mechanism

The insertion state to the board is a light crimping, which enables the pre-fixed process to the board.

## Applications

Note PC, Small business equipment

The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. ### Product Specifications

|        | Current rating | Crimping |            | AWG 24  | : 3A | Operating Temperature Range | -30 to +85℃(Note 1) |
|--------|----------------|----------|------------|---------|------|-----------------------------|---------------------|
| Doting | (Note 1)       |          | Cable Size | AWG 26  | : 2A | Operating Moisture Range    | 40 to 80%           |
| Rating |                |          |            | AWG 28  | : 1A | Storage Temperature Range   | -10 to +60℃(Note 2) |
|        | Voltage rating | Crimping |            | 250V AC |      | Storage Moisture Range      | 40 to 70%           |

| Item                            | Specification  | Condition  |
|---------------------------------|--|--|
| 1. Insulation Resistance        | 1000M ohms Min   | 500V DC  |
| 2. Withstanding voltage         | No flashover or insulation breakdown.                                  | 650V AC/1 minute   |
| 3. Crimping Area Resistance     | 30m ohms Max.  | 100mA  |
| 4. Vibration                    | No damage, cracks, or parts looseness.                                 | Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 2                                   |
|                                 |  | hours in each of the 3 directions.   |
| 5. Humidity (Steady state)      | Contact resistance: 30m ohms Max Insulation resistance:500M ohms Min   | 96 hours at temperature of $40^\circ\!C$ and humidity of 90% to 95%                      |
| 6. Temperature Cycle            | Contact resistance: 30m ohms Max Insulation resistance: 1000M ohms Min | Temperature $-55 \rightarrow 5$ to $35 \rightarrow +85 \rightarrow -5$ to $35^{\circ}$ C |
|                                 |  | time $30 \rightarrow 5$ to $15 \rightarrow 30 \rightarrow 5$ to $15$ min under           |
|                                 |  | 5 cycles.  |
| 7. Resistance to Soldering heat | No deformation of components affecting performance.                    | Manual soldering: 300℃ for 3 seconds   |
|                                 |  | Flow: 250°C for 10 seconds   |

Note 1: The rated current will be changed according to cable sizes for use.

Note 2: Includes temperature rise caused by current flow.

Note 3: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non conducting condition of installed connectors in storage, shipment or during transportation.

Note 4: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

### Material

| Product                   | Part      | Material  | Finish      | Remarks |
|---------------------------|-----------|-----------|-------------|---------|
| Crimping Plug             | Insulator | Polyamide | Black       | UL94V-0 |
| Crimping Contact for Plug | Contact   | Brass     | Tin plating |         |

## Ordering Information

Note 1.The quantity at the specific No. "None" is delivered per bag (100pcs.). If needed, please order the products per bag.

The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. All non-RoHS rades have been discontinued control of the Bodard status on the Hirose website RoHS search at www.hirose-connectors.com, or contact your Hirose sales representative.

| Precautions             |  |
|-------------------------|--|
| 1. Recommended          | Flow: 250°C for 3 seconds  |
| Soldering Condition     | Manual soldering: 290±10°C for 2 seconds   |
|                         | If the cable neighboring the connector is bent and unstraightened, secure a large bending radius because the   |
|                         | Jacket will be broken by the solder heat and the contact wire will be exposed. The Jacket in this part will be tore.   |
|                         | <ul> <li>After the soldering process. If a stress is applied to the cable in the state where the connector and the cable has heat inside, the Jacket hold area will be loosen. Therefore, carry out the post-soldering operation after the connector has returned to the room temperature</li> </ul> |
| 2. Cleaning Condition   | Refer to Nylon Connector Use Hand book.  |
|                         | Don't use a solvent such ass trichloroethylene which invades the cable Jacket. In addition, avoid heat   |
|                         | cleaning by a solvent.   |
| 3. Connection Condition | Refer to the Nylon Connector Use Hand book.  |
