

3 20e_cTI-60t_TI Pin Converter

The **20e_cTI-60t_TI** Pin Converter is designed to attach an emulator cable with a 20-pin cTI JTAG connection to a target board with 60 pin trace connector.

1. **Make sure the target is not powered when connecting!**
2. Connect the 20 pin Male connector to your cTI emulator.
3. Connect the 60 pin Male socket to your target board.

WARNING

Caution should be exercised in connecting this adapter to the JTAG emulator and the target JTAG header. Pay special attention to the orientation and keying and pin outs. Be careful to connect with the correct orientation. This adapter is not intended to be hot pluggable. Unplug power from all sources prior to connect or disconnect.

QUICK START GUIDE

Blackhawk™ JTAG Pin Converters (20e_cTI)

Installation Requirements

- Emulator with new compact 20 pin TI (cTI) JTAG socket
- TI development Board with 14, 20(ARM®), or 60 pin JTAG header

Pin Converters

This document covers the installation and use of (3) pin converters designed to work with an emulator that has the new compact TI (cTI) 20-pin JTAG connection (header pin to signal shown in the table to the right). The pin converters described in this document are:

- **20e_cTI-20t_ARM Pin Converter**
For connecting to a target board with 20-pin MultiICE connector.
- **20e_cTI-14t_TI Pin Converter**
For connecting to a target board with standard TI 14-pin JTAG connector (pin 6 keyed).
- **20e_cTI_60t_TI Pin Converter**
For connecting to a target board that has the TI 60-pin trace header.

Compact TI (cTI) 20-Pin JTAG Header Signal Table

Pin	Name	Pin	Name
1	TMS	2	nTRST [†]
3	TDI	4	TDIS
5	TVD	6	KEY
7	TDO	8	GND
9	RTCK	10	GND
11	TCK	12	GND
13	EMU0	14	EMU1
15	nSRST [†]	16	GND
17	EMU2	18	EMU3
19	EMU4	20	GND

[†] Signals are active low

Important Environmental Considerations

Caution is necessary to minimize ESD (Electro-static Discharge) which can damage electronic components. Use in a controlled environment where ESD materials and practices are employed is highly recommended.

1 20e_cTI-20t_ARM Pin Converter

The **20e_cTI-20t_ARM** Pin Converter is designed to attach an emulator cable with a 20-pin cTI JTAG connection to a target board with 20 pin MultiICE connector.

1. Make sure the target is **not powered** when connecting!
2. Connect the 20 pin Male connector to your cTI emulator.
3. Connect the 20 pin Female socket to your target ARM.

WARNING

Caution should be exercised in connecting this adapter to the JTAG emulator and the target JTAG header. Pay special attention to the orientation and keying and pin outs. Be careful to connect with the correct orientation. This adapter is not intended to be hot pluggable. Unplug power from all sources prior to connect or disconnect.

9	TCK	10	GND
11	RTCK	12	GND
13	TDO	14	GND
15	nSRST [†]	16	GND
17	NC	18	GND
19	NC	20	GND

[†] Signals are active low

Emulator Connection:
20 pin cTI male header
(0.050" x 0.100")

Target Board Connection:
20 pin female socket header
(0.100" x 0.100")

20e_cTI-14t_TI Pin Converter 2

The **20e_cTI-14t_TI** Pin Converter is designed to attach an emulator cable with a 20-pin cTI JTAG connection to a target board with 14 pin connector with pin 6 keyed.

1. Make sure the target is **not powered** when connecting!
2. Connect the 20 pin Male connector to your cTI emulator.
3. Connect the 14 pin Female socket to your target TI.

WARNING

Caution should be exercised in connecting this adapter to the JTAG emulator and the target JTAG header. Pay special attention to the orientation and keying and pin outs. Be careful to connect with the correct orientation. This adapter is not intended to be hot pluggable. Unplug power from all sources prior to connect or disconnect.
