

TopMax-II

TopMaxII is a high-speed universal device programmer for USB 2.0 PC-interface. It programs a 64Mbit (AM29LV641) flash memory in 42 seconds. This is a true low-price production oriented system. The **TopMaxII** meets the demands of today's programming solution for lab and production line applications.

PRODUCT HIGHLIGHTS

- High-speed Universal Programmer
- Support USB 1.1 / 2.0 Port in PC

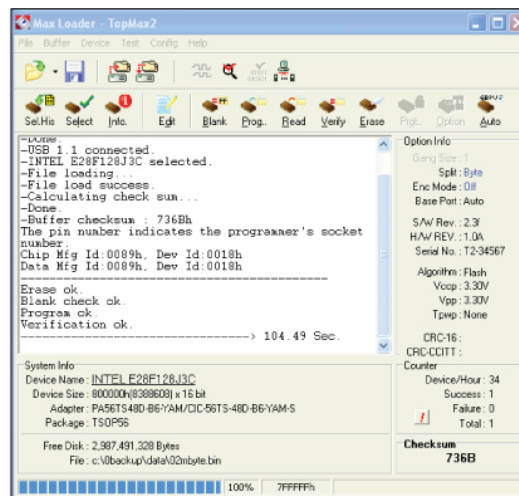

KEY FEATURES

<Software>

- Auto search device select function supports E(E)PROMs & Microcontrollers.
- Device insertion test identifies improperly inserted device before programming.
- Gang Program Mode allows programmers up to 8 units as concurrent programming system. (External START key allows TopMaxII to operate in stand-alone mode)
- Check for incorrect device insertion, backward, incorrect position, and poor pin contact.
- Device Operations: Read, Blank check, Program, Verify, Checksum, Data compare, Security, Auto(blank check-program-verify), Option Bit program.
- Display programming parameters and optional bit information on the screen.
- Set device/buffer address ranges before programming devices.
- Extensive on-line F1 help system provides text and graphics.
- User-changeable programming parameters.
- Built-in editor for both buffer data and test vectors.
- Support Binary and all hex files (POF and JEDEC, Intel Hex, Motorola S Records, Tekhex, straight hex, hex-space, Extended Tekhex, and others, automatic file type recognition) with Load, Edit, and Save commands.

<Hardware>

- One on-board FPGA for extremely fast communication.
- Supports real low-voltage support : 5, 3.3, 2.7, 1.8, 1.5 volt for programming power.
- Detects all pin locations for poor or damaged pin contacts.
- External START key allows production programming mode.
- Internal universal power supply, 110-240 VAC (no separate power supply required in foreign country).
- Current limiting protects hardware circuit from improperly inserted or defective chips and operation errors.
- Standard 48-pin ZIF (Zero Insertion Force) socket accepts both 300mil and 600 mil DIP devices.
- True universal pin driver hardware.
- Support a high-speed USB2.0 port for PC interface.
- Support a standard IEEE-1149.1 (JTAG) port
- Hardware diagnostic program exams all socket-pin drivers before using programmer.

DEVICES TESTED

- TTL type : 54, 74(S, LS, L, H, HC) series
- CMOS type : 40, 45 series
- Dynamic Memory : 4164 - 1MBit
- Static Memory : 6116 - 6256
- User definable test pattern generation

TECHNICAL SPECIFICATION

Dimension:

- Module: 11.0"(L) x 7.25"(W) x 2.5"(H)
- Weight: 3.25 lbs
- Socket: Textool 48 pin ZIF standard.

SYSTEM REQUIREMENT

- TYPE: 386, 486, Pentium or compatibles. PS/2, Portable(notebook) computer.
- A hard disk drive (4 Megabytes) is recommended for software installation / set up.
- PC RAM size: 512K of conventional memory
- I/O PORT: USB 1.1 or 2.0 port
- OS: WINDOWS 95 / 98 / 2000 / NT / XP or greater

SAFETY STANDARD

- CE compliant

STANDARD ACCESSORIES

- Power Cord
- USB Cable
- Software CD and User's Guide
