NTE999 Integrated Circuit Adjustable Precision Shunt Regulator

Description:

The NTE999 is a three-terminal adjustable shunt regulator with guaranteed thermal stability over a temperature range of -0° to $+70^{\circ}\text{C}$. The output voltage may be set to any value between V_{ref} (approximately 2.5V) and 36V with two external resistors. This device has a typical dynamic output impedance of 0.2Ω . Active output circuitry provides a very sharp turn-on characteristic, making the NTE999 an excellent replacement for zener diodes in many applications.

Features:

- Equivalent Full-Range Temperature Coefficient: 30ppm/ $^{\circ}\text{C}$ Typ
- Adjustable Output Voltage
- Fast Turn-On Response
- Sink Current Capability: 1mA to 100mA
- Low Dynamic Output Impedance: 0.2Ω Typ
- Low Output Noise Voltage
