## NTE5620 TRIAC 800V<sub>RM</sub>, 8A, TO220 Full Pack

The NTE5620 TRIAC is designed primarily for full-wave AC control applications, such as light dimmers, heater controls, motor controls, and power supplies; or wherever full wave silicon gate controlled solid state devices are needed. TRIAC type thyristors switch from a blocking to a conducting state for either polarity of applied voltage with positive or negative gate triggering.

### **Features:**

- Blocking Voltage – 800 Volts
- All Diffused and Glass Passivated Junctions for Greater Parameter Uniformity and Stability
- Small, Rugged, TO220 Full Pack for Low Thermal Resistance, High Heat Dissipation, and Durability
- Gate Triggering Guaranteed in Four Modes

### **Absolute Maximum Ratings:**

Peak Repetitive Off-State Voltage, V <sub>DRM</sub> (T <sub>J</sub> = -40° to +125°C, 1/2 Sine Wave 50 to 60Hz, Gate Open, Note 1)	.....	800V

Note 1. Ratings apply for open gate conditions. Thyristor devices shall not be tested with a constant current source for blocking capability such that the voltage applied exceeds the rated blocking voltage.

Note 2. The case temperature reference point for all T<sub>C</sub> measurements is a point on the center lead of the package as close as possible to the plastic body.
