

#### Features

- Formerly Fullec brand
- Extremely low capacitance
- Very high bandwidth
- Small package, minimal PCB area
- RoHS compliant\*

### **Applications**

- GR-1089
- ITU K.20 and K.21
- ADSL2+ and VDSL2 linecards
- LAN, WAN equipment

## **FVC Series Voltage Control Devices**

#### Voltage Control

Bourns<sup>®</sup> voltage control devices are used with high-speed series protectors to protect sensitive circuits from electrical disturbances caused by lightning-induced surges, inductive-coupled spikes, and AC power cross conditions. The unique structure and characteristics of the device are used to create an overvoltage protection device with precise and repeatable turn-on characteristics with low voltage overshoot and high surge current capabilities.

#### **Specifications**

	Surge Rating	Electrical Characteristics							
Part Number	lpp (A)	V <sub>DRM</sub> (V)	V <sub>S</sub> (V)	V <sub>T</sub> (V)	I <sub>DRM</sub> (μΑ)	I <sub>S</sub> (mA)	I <sub>Т</sub> (А)	I <sub>H</sub> (mA)	C <sub>O</sub> (pF)
FVC2300	4	190	260	3	5	400	1	150	6
FVC3100	4	275	350	3	5	400	1	150	6

Ipp (peak pulse current) - maximum rated peak impulse current with 1.2/50 µs waveform

 $V_{\mbox{DRM}}$  (peak off-state voltage) - maximum voltage that can be applied while maintaining off state measured at  $I_{\mbox{DRM}}$ 

 $V_S$  (switching voltage) - maximum voltage prior to switching to on-state measured at 100 V/ $\!\mu s$ 

VT (on-state voltage) - maximum voltage measured at rated on-state current

 $I_{\ensuremath{\mathsf{DRM}}}$  (leakage current) - maximum peak off-state current measured at  $V_{\ensuremath{\mathsf{DRM}}}$ 

 $I_S$  (switching current) - maximum current required to switch to on state  $I_T$  (on-state current) - maximum rated continuous on-state current

IH (holding current) - minimum current required to maintain on state

on-state C<sub>O</sub> (off-state capacitance) - typical off-state capacitance measured at 1 MHz with a 2 V bias

#### **Typical Performance Characteristics**

General Notes:

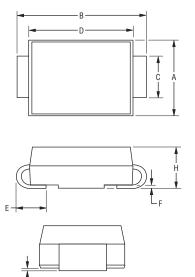

- All measurements are at an ambient temperature of 25 °C. IPP applies to -40 °C through +85 °C.
- IPP is a repetitive surge rating and is designed to be maintained for the life of the product.
- The devices are bidirectional. All electrical parameters and surge ratings apply to forward and reverse polarities.
- Special voltage (VS and VDRM) and holding current (IH) requirements are available upon request.
